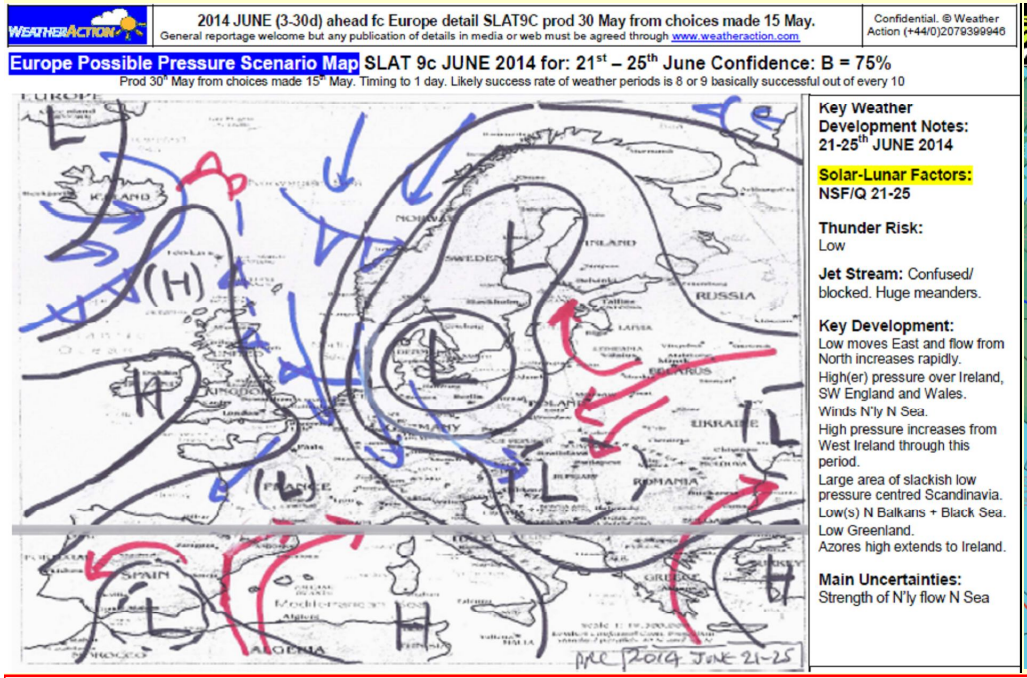
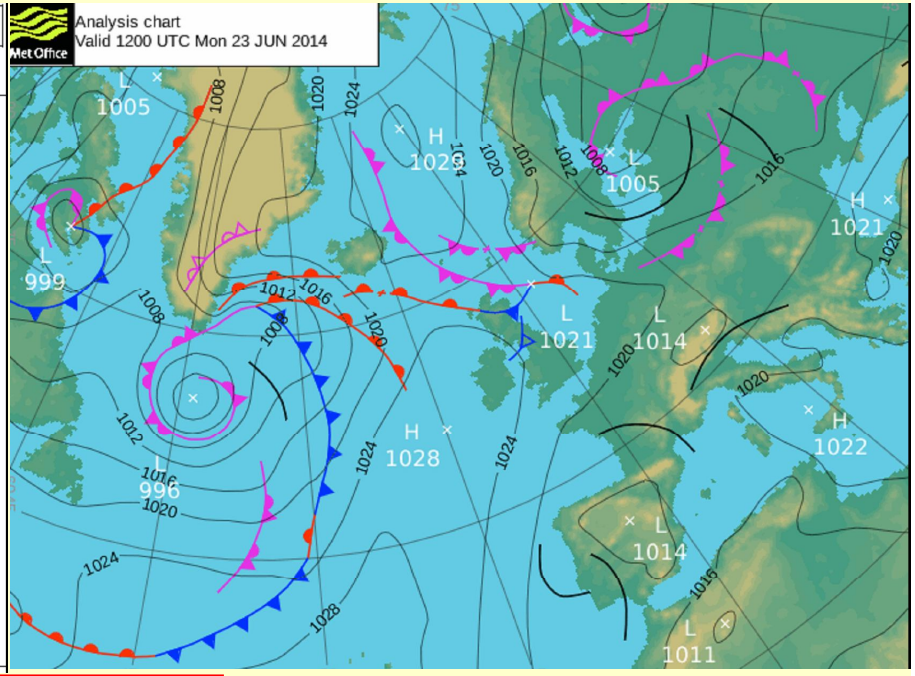
WeatherAction 6week ahead forecast map ~21-25 June Superbly confirmed





Superb! commented WeatherAction forecast users on comparing WeatherAction forecast map 21-25 June with MetO Obs-Analysis chart (above right). The MetO and their CO2 theory say "This can't be done"

Note the maps are different projections but key pressure features are similar.

"SPOT-ON!" say WeatherAction Europe forecast users.

- *'MidSummer snow in the Land of the Midnight Sun' confirmed*

On www.WeatherAction.com Public COMMENT blog 24 Jun 2014, Saskia Steinhorst (Neth. sub.): "SPOT ON wrt snow in Summer in Scandinavia, Piers! It explains that cold 'under-current' I've been speaking of the last week or so, as the wind has been predominantly coming from NW-NE in our region. I'm increasingly convinced our region is more under the influence of patterns near Scandinavia…."

Glasto & Wimbledon!

WeatherAction forecast users noticed MetO & other short range forecasters have changed their minds a number of times about the weather critical Glastonbury Concert & Wimbledon Tennis 'weekend plus' period and are coming round to WeatherAction's 6wk ahead detailed forecast.
