

EU Climate pledge: “road to ruin based on failed science and fraudulent data”

- “A dodgy fiscal stimulus to back dodgy regimes”
- Met Office/UN (& Climate Groups) challenged to make - & bet on! - temp forecasts based on satellite data not ‘untrustworthy’ data from CRU (Univ East Anglia UK)
- Climate Challenge scientists to call Gordon Brown’s bluff.

Scientists today (Dec11) attacked the EU climate pledge (ref 1) as a ‘road to ruin based on failed science and fraudulent data (ref 3)’ and issued direct challenges to the Met Office and Gordon Brown to rely on evidence based science and policy not on a new green quasi-religion.

Piers Corbyn astrophysicist of WeatherAction long range weather and climate forecasters – himself just back from a the Copenhagen Climate Challenge (ref 2) meeting of ‘Climate Realist’ scientists said:

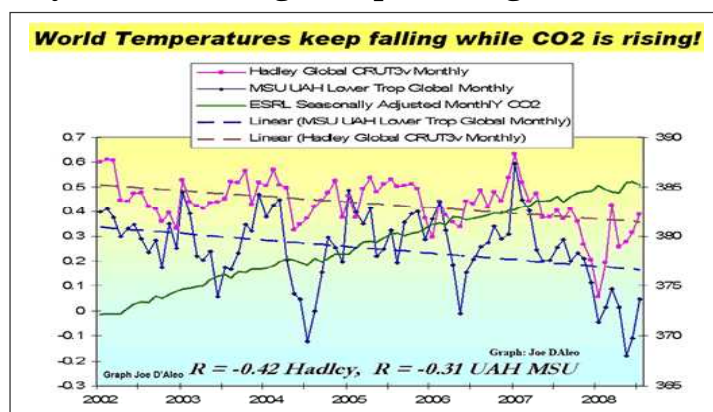

“The 7.2bnEuros (£6.5bn; \$10.6bn) climate change handout is economic nonsense based on failed science and fraudulent data (ref3). It is the road to ruin to hand these billions to regimes of questionable democratic record who hold up their begging bowls for climate change support and spend it on their own administration - including military - and then as part of the deal give some back to the

UK and EU for stupid green technology such as wind farms and solar panels. The handouts cost us money and jobs and the consequent £half billion cuts in UK spending such as on transport and education which partly comes back as fiscal stimulus to construct green nonsense is daft. The UK and EU does not need this, we need real jobs and the population of the developing world needs **real aid** – clean water, cheap (coal based) electricity and to fight malaria. The handouts to forested developing countries to ‘preserve’ forests are another con. Their rulers will just claim they are going to destroy less forest than they would have but do the same and grab the handout.

Will the EU adopt a new anti-crime policy to pay would-be burglars to reduce their amount of burglary?!

Lets get real and have honest policies to defend biodiversity such as sanctions against such countries for destruction of biodiverse forests and **an embargo on products from their destruction. These forests must be defended for their own sake** and the true facts should be known: (i) mature forests do not reduce CO₂; they absorb and emit (when trees die) the same amount; (ii) CO₂ is not a pollutant it is good and more of it makes all agriculture more productive and forests more abundant. **The green fiscal stimulus is nonsense.**

- Low carbon jobs and carbon trading is costing the public billions and will achieve nothing.
- It is causing food prices to rise through the burning of food as biofuels instead of selling it as food and this has caused food riots, starvation and means suffering and increased death-rates of children in developing countries.
- The carbon bubble of false value is being created by ‘green bankers’ to replace the burst property bubble of false value, and it too will burst.

Challenge to Met Office/UN forecast that 2010 ‘could be the warmest on record’

Mr Corbyn said “This (ref4) is brazen political propaganda to boost the chances of a political deal at Copenhagen.

It is based on failed computer models which have no scientific basis and have a track record of complete failure.

ALL the UN/IPCC etc forecast for ongoing warming since 2000 have failed (ref5) and the UK Met Office’s own forecasts for the summers of 2007, 08 and 09 and the winter of 08/9 scored zero success out of 4. They could not have been more wrong (ref6). **Why should anyone believe them now?** On the other hand, the WeatherAction **long range** forecasts for the same periods based on solar activity scored 4/4 (ref6). Of course the Met Office making a forecast to be tested against untrustworthy (‘fraudulent’) data from the CRU/UEA (which MO said they were checking or have we misunderstood?!) is absurd. / over

We challenge:

- (i) **The Met Office to test their forecast against satellite data** (which was the same as the CRU data in 1998 - the recent peak of world temperatures - but is now running at least 0.3deg C lower (ref7) **a gap which is equal to half the claimed rise since the 1970s!**)
- (ii) They offer **public bets** that world temperatures (satellite measured) will be higher or the same as 1998 in (a)2010, (b)2011, (c)2012, (d)2013... etc for 100 years. We say they will be lower.
- (iii) **ANY Groups such as Climate Chaos, Greenpeace or Friends of the Earth - who should welcome the opportunity to put their money where there mouths are - to bet against us on these climate claims.** (see also ref9).

Science Challenge - "Gordon - Convince us!"

On Dec 5th Gordon Brown denounced Climate Realists who question the man-made global warming theory as 'Flat-Earthers' and stated to the misguided demonstrators for action against climate change whom he invited into 10 Downing Street that "We (GB and the Climate Chaos Group there one presumes) have got to show them ('Flat-Earthers') that the scientific evidence is strong" Piers said he and a number of other qualified scientists ('Flat Earthers') such as UK signatories of the Copenhagen Climate Challenge to the UN (ref2) are going to formally write to Gordon Brown to welcome his offer and attend any presentation he organizes intended to convince us - which we suggest be held in public. "Meanwhile we request Gordon looks at the existing refutations by qualified experts of the theory of man-made climate change spelt out in the Copenhagen Climate Challenge (ref2) and at WeatherAction's conference on Oct 28th (ref8) at Imperial College to which Global Warmers refused to attend to justify their case to scientists".

- 9) WeatherAction are now even more confident of our forecasted continuing general decline in world (satellite measured) temperatures - staying colder than now for at least 100 yrs and expect an even colder world than we first suggested. See - [WeatherAction World Climate Forecast for next 100 years Film Jun 09 = http://www.youtube.com/watch?v=VakA4-qAuWE](http://www.weatheraction.com/pages/pv.asp?p=wact3&fsize=0) **World cooling has set in...** <http://climaterrealists.com/index.php?id=3307&linkbox=true>

Time to Choose

The world public, delegates and onlookers to the Copenhagen Climate summit must choose if they want to continue with politically driven failed science which has become a dangerous new religion and burden to world development; or support evidence-based science and public policy, and Climate Realism. That opens the way to apply solar-based science of long range Weather Extreme Forecasting And Defence (WEXFAD) to defend the world from *predictable* extreme weather events.

It's time for honest green campaigners to get off the Titanic of Climate Change hype while they can, and stand tall themselves to preserve bio-diversity, rain-forests & defend nature's hosts of treasures for their own sake. **If honest greens don't jump ship now they and what they thought they stood for will get dragged down by the gathering world wave of revulsion against everything seen as 'green', self-serving 'science', state handouts to environmental scams and all things dear to the chattering classes.**

**Support evidence-based Science and Public Policy! -
No to any DEAL in Copenhagen!**

SIGN the Downing St Petition! <http://petitions.number10.gov.uk/UEACRU/>

'We the undersigned petition the Prime Minister to suspend the Climate Research Unit at the University of East Anglia from preparation of any Government Climate Statistics until the various allegations have been fully investigated by an independent body.'
The link is easy to use It Emails you back for 'signature' confirmation. **Please sign & forward to someone else to sign.**
Then ask your MP to sign too and Oppose any Copenhagen Deal (*only British subjects; other countries have other petitions).

Weather Forecast for Copenhagen!

30th November 2009 WeatherAction News No 91 = ClimateGate1 =
<http://www.weatheraction.com/docs/WANews09No91.pdf>
WeatherAction releases free long range forecast for Copenhagen - Climate summit to be hit by blustery deluges, probably turning to snow or blizzards & icy blasts in the region at times - espec heavy when President Obama visits.
