Blizzards hitting Copenhagen Tues 15th Dec confirm WeatherAction **SOLAR-BASED** long- range forecast in detail *to the day*

Piers Corbyn, astrophysicist of WeatherAction *solar-based* long range forecasters, said: "We are very pleased with these **blizzards** forecasted by our Solar Weather Technique which depends on solar-particle and magnetic effects and has nothing to do with CO2.

"Our forecast created about 30 days ahead and announced about 20 days ahead was very specific that 14-16/17 would be particularly snowy with biting cold winds in the region. What we said 30 days ahead was as good as standard Met 2 days ahead.

"The blizzards might concentrate some minds into the realisation that the whole of the CO2 Climate Change junket is a world scam based on failed science and fraudulent data.

Should World Climate Policy be based on a lie?

This is the question we asked John Prescott former Deputy Prime Minister of UK -
<http://climaterrealists.com/index.php?id=4649&linkbox=true&position=3>

It now appears that Tony Blair former Prime Minister thinks maybe it should - just as he said the

Iraq war was justified even though based on the lie of non-existent Weapons of Mass Destruction. ***The Daily Telegraph:- The world must take action on climate change at Copenhagen even if the science is not correct, Tony Blair, the former Prime Minister has suggested.*** See: <http://climaterrealists.com/?id=4654>

His justification is insane – a 'precaution' against extreme events which it is now *proven* are not caused by CO2! – and which we can forecast by solar activity. (see links to *Copenhagen Climate Challenge* in letter to John Prescott above)

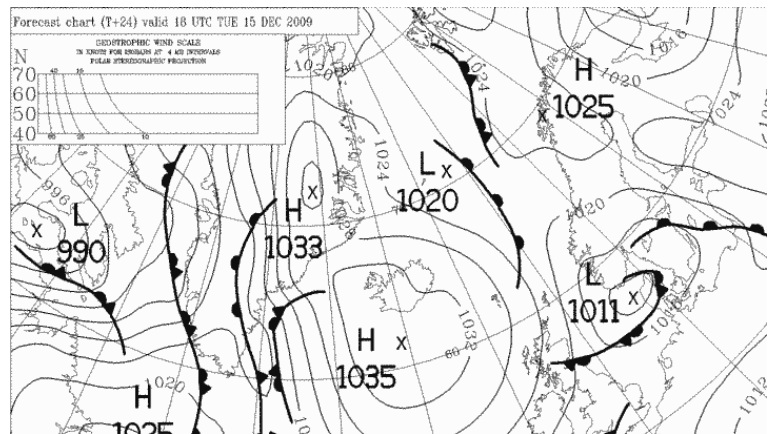

Lets get real! The only gainers out of any deal at Copenhagen are carbon traders whose deals make productive workers redundant – eg in Redcar North UK (link below) and various dodgy regimes, silly green projects, self-serving 'scientists' & the likes of Al Gore.
<http://www.telegraph.co.uk/comment/columnists/christopherbooker/6798052/What-links-the-Copenhagen-conference-with-the-steelworks-closing-in-Redcar.html>

The losers are most of the world through the misery and ruin these policies will cause - burning of food as biofuels - rising food and energy prices - increased death of children in developing countries - holding back world development - loss of state intervention and jobs in the UK to pay for hand-outs to dodgy regimes - and so on. The world needs to take precautions AGAINST such ruin.

The only sensible precaution is to have NO Deal at Copenhagen

Tuesday
Day weather

*(As issued) Weather Forecast for Copenhagen!

30th November 2009 WeatherAction News No 91 = ClimateGate1 =
<http://www.weatheraction.com/docs/WANews09No91.pdf>

WeatherAction releases free long range forecast for Copenhagen - Climate summit to be hit by blustery deluges, probably **turning to snow or blizzards & icy blasts in the region at times.**

**THE WINDIEST COLDEST PART WAS PREDICTED AS:
14th-16/17th Dec will have more snow showers which will turn heavy with **biting cold winds.****

Weather Action Extreme Events Forecasts around the World 16-31 Dec (issued Dec 2)

Released FREE because of their importance are from 'Europe & Med' & 'World' buttons at <http://www.weatheraction.com/member.asp>

Further forecasts & detail & discussion on reasons for events are also available on that link.

19th – 31st Dec 09 MEDITERRANEAN A series of waves of severe often thundery weather and local floods due to deep or exceptionally deep active lows in the Western Med.

Main periods West Med (Italy Corsica Sardinia, SE France, East Spain, Malta, N Africa)

19-20 Dec Major SWIP & thundery Deluges / extreme activity

22-23 Dec Major SWIP & thundery Deluges / extreme activity

25-27 Dec Moderate SWIP & thundery deluges / activity

28-30 Dec VERY MAJOR thunderstorms & deluges with severe gales & floods - TOPa SWIP with notable simultaneous extreme events around the world.

19th – 31st Dec 09 USA & CANADA a series of waves of severe and at times dangerous wintry weather

From around 19th there may be a series of Sudden (polar) Stratospheric Warmings (timing unsure) or a continuing Stratospheric Warming the consequences of which are to make the jet stream thrash about and give high temperature contrasts and whacks of very cold air at times in Canada & USA and severe deluges of snow/blizzards hail & winter thunder / tornadoes at times – exceeding the expectations of standard meteorology from a day or two ahead.

The region of heavy snow and extreme events at times is wide including very cold blasts in Canada and to the South potentially Arizona/Colorado/New Mexico and most parts of Central / MidWest USA. Main periods: 19-20 Dec Major SWIP & Deluges / extreme activity
22-23 Dec Major SWIP & Deluges/ extreme activity
25-27 Dec Moderate SWIP & deluges/ extreme activity
28-30 Dec VERY MAJOR cold blasts & snowstorms / extreme activity TOPa SWIP with notable simultaneous extreme events around world.

Indian Ocean & Australia

N Indian Ocean 16-18 Dec TD / Disturbance likely off Sri-Lanka with heavy rain Sri Lanka
S Indian Ocean 16-18 Dec TD / Disturbance likely East of Madagascar prob stays in Ocean

(Off) Queensland or in West South Pacific Ocean:

16-18 Dec TD/TC off Queensland with heavy rain hail & thunder effects likely on land

19-20 Dec South Pacific TC formations likely in Pacific

22-23 Dec South Pacific TC formation likely in Pacific

25-27 Dec South Pacific TD development likely in Pacific

28-30 Dec South Pacific MAJOR TC formation likely in Pacific TOPa SWIP

Support front line science!

These forecasts are given Free but I need an Xmas present! says Piers Corbyn.

Seriously, WeatherAction gets no state funding & Copenhagen has taken a lot of effort, so please

BUY or DONATE via

Thank you!

WeatherAction Xmas Press Conference & Party Frid 18 Dec

12noon WeatherAction Office 175 Borough High St SE1

- After Copenhagen – What next?
- Getting scientific alternatives to CRU data
- December Extreme events review & what's coming in Jan

What Was Hidden?

Marc Sheppard (eg) of American Thinker shows in detail how the CRU (Climate Research Unit at University of East Anglia) data 'is fraud' in a number of respects, how it has hidden a number of real changes such as the Medieval warm period and Little Ice Age - <http://climaterealist.com/index.php?id=4571&linkbox=true&position=4> and overstates recent 'surface measurements' due to (eg) reliance on unreliable urban stations which do not pass official siting criteria - http://www.copenhagenclimatchallenge.org/index.php?option=com_content&view=article&id=59&Itemid=55
