WeatherAction New Year Message

(also carried in Jan 2010 Forecast Bulletin)

• **Jan AND Feb will be unusually cold in Britain, Ireland, & Europe - Standard Meteorology / 'Global Warming' forecasts will fail AGAIN.**

• **'Man-Made Climate Change' is failed science based on fraudulent data**

• **Gordon Brown & all politicians, please, PROVE IT or DROP IT**

• **2010 is the year of the fight for evidence-based science & policy making.**

• **Carbon Trading & all CO2 reduction schemes must stop.**

Blizzards in Copenhagen greet Obama at *Global Warming Summit!*

“2010 must see the final end of the Man-Made Global Warming scam and the resurrection of evidence-based science & policy making”

said Piers Corbyn astrophysicist of WeatherAction long range weather & climate forecasters on New years Eve “The CO2 theory of Global Warming and related attempts by standard meteorology to do long range forecasts have failed the world for the last decade.

“The dangers to the public of Climate Change policy and the continuing severe weather this winter in Britain Ireland Europe and the USA give us a duty to publicly release our headline forecast for the rest of the winter. **January will see ferocious and dangerous winter weather with widespread blizzards AND February 2010 will also be unusually cold. The media are publicly welcome to publish further information on page one of the forecast which includes other important news & warnings.**

UK ferocious dangerous winter weather - road salt likely to run out

“UK road salt is very likely to run out in more than just Cornwall where failure to salt roads because salt ran out has already caused road deaths. The lack of preparation and further otherwise avoidable accidents can be placed squarely on the Met Office’s silly ‘probably mild winter’ forecast” said Piers Corbyn. “We knew that forecast was nonsense 6 months ago”.

11 Cities Ice canal race very likely in Holland!

“The bitter cold weather includes the continent and the ‘11 cities’ ice skating race (*Elfsteden Tocht*) in Holland on frozen canals is a near certainty according to our WeatherAction long range forecast. The race last took place on 4 Jan 1997”.

For the Full forecast inc page1 go to <http://www.weatheraction.com/member.asp> .The forecast details in the 10 weather periods on pages 2 to 4 are however reserved for paying customers - without whom our research and forecasts would be impossible - unless publication of such details is agreed with WeatherAction.

Climate Change *Policy* costs lives next page

Climate Change *Policy* costs lives

“ALL the predictions of CO2-based Global Warming / Climate Change ‘Theory’ since 2000 have failed as has the pretence of standard meteorology to do long range forecasting. The world is cooling while CO2 is rising, there have been less damaging storms not more and all the other alarmist claims of the *Global Warmers* have been shown to be untrue (see http://www.copenhagenclimatechallenge.org/index.php?option=com_content&view=article&id=48&Itemid=55 & John Coleman founder of the Weather Channel <http://www.kusi.com/home/78477082.html?video=pop&t=a%22+rel%3Dnofollow+target%3Dblankhttp://www.kusi.com/home/78477082.html?video=pop&t=a%3Ehttp://www.kusi.com/home/78477082.html?video=pop&t=a>)

These failures are not just academic jokes at the taxpayers expense they are causing unemployment, misery and death. Tata steel is receiving a \$billion in carbon handouts for moving jobs from steelworks in the UK to India (<http://climaterrealists.com/index.php?id=4720>). Children in the developing world are suffering starvation due to rising food prices following the burning of food as biofuels to keep – eg - misguided readers of the Guardian & Independent happy in the belief that their pet climate

policies are *Saving the Planet*. Coach passengers died in Cornwall in December on a road that was an ice-sheet because the Council had run out of salt. What else would the Council do but run out of salt since the Met Office announced that this would be a mild winter in line with their Global Warming belief?

Like December the rest of this winter will be generally cold, icy and snowy and bring dangerous conditions in Britain, Ireland & Europe. This WeatherAction forecast is the same as we made 6 months ago and is made with **95% confidence**. The UK Met Office have now changed their ‘probably

mild’ winter forecast to ‘perhaps cold’ for January & February. They say “For the rest of winter...the chance of colder conditions is now 45%; there is a 30% chance of average & 25% chance of milder conditions -

<http://www.metoffice.gov.uk/weather/seasonal/2009/winter/> One must ask how many forecasts need the Met Office make before they get it right? ALL their forecasts for the unusually extreme seasons in the last 3 years were the opposite of reality (summers 2007, 2008 & 2009 and winter 08/09) whereas Weather Action’s Solar Weather Technique – based on solar particle and magnetic effects - scored 4/4. The Met Office would be best advised to leave the issuing of their winter forecast till Feb 28th. Frankly their efforts and the rest of the Global Warmers club mislead the public and cost lives.

The lesson of 2009 for Global Warming Policy is that it must stop. The lesson of 2009 for solar based long-range forecasting (the SWT*) is that it works - as has been demonstrated dramatically on many occasions especially for extreme weather events. **The simultaneity of world weather extreme events is incomprehensible to standard meteorology but follows naturally from the *Solar Weather Technique, which can also predict extreme weather events from many months ahead**

Three points for action in 2010 include:

1. **Campaign for accountable evidence-based science and policy** with public meetings & actions. As a first step we ask that Gordon Brown organise a public event to which scientific observational evidence for CO2 theory be presented, further to his assertion that such evidence exists [see video <http://www.youtube.com/watch?v=EAV7NHZcEcY>]
2. **Consumer Action.** Refuse to buy goods which claim to be aimed at reducing CO2/Climate Change and ask that such dishonest claims end.
3. **Reach out to honest Greens and political activists** who are being brought down by the CO2 scam when all they want to do is defend bio-diversity, nature’s richness & people’s rights & living standards” .

STOP use of fraudulent data! - SIGN

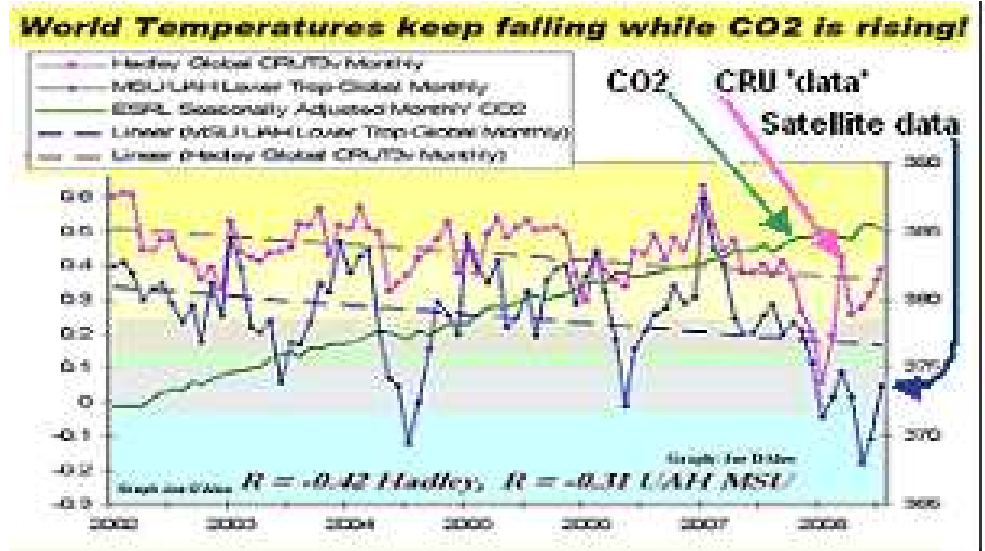

Downing St Petition! <http://petitions.number10.gov.uk/UEACRU/>

‘We the undersigned petition the Prime Minister to suspend the Climate Research Unit at the University of East Anglia from preparation of any Government Climate Statistics until the various allegations have been fully investigated by an independent body.’
