

What have UK MPs' whitewash of Climate-Gate & death in Lanarkshire ice & snow got in common?

Whitewash and snow are the same colour is one clue but the true answer is deadly serious.

“The shameful ‘ClimateGate’ cover-up (Report 31 March) by MPs of the fraudulent dogma of man-made Climate Change directly buttresses baseless Met Office warmist ‘forecasts’ such as for the winter which ensured UK Councils ran out of salt and increased risk of road deaths like in Lanarkshire black-ice 31 March*.
“Further it gives Government, Councils and the BBC the cover to refuse to use long range solar-based forecasts which provenly work and could cut misery and save lives”, said Piers Corbyn astrophysicist of WeatherAction.com

The upturned coach which crashed 10ft into a river from black ice covered in fresh snow on a Lanarkshire bridge 05.50am 31 March. Natasha Jade Paton, 17, from Cleghorn, near Lanark died in the crash.

Why Wasn't that Lanarkshire Road bridge salted 30/31 March? BBC challenged to ask the questions which expose the truth

The ice & snow, which hit Scotland, Ireland & parts of Wales & N England, were forecasted in detail to the day 5 weeks ahead by WeatherAction. (Right) - Final Weather period in WeatherAction's Long range March forecast: - available via <http://www.weatheraction.com/member.asp>
The WeatherAction March forecast also correctly warned March 2010 would be 'the worst type of March possible for farming & gardening' due to snow/icy start, mild 'sprouting' middle & snow/icy end in many parts.

Cover up MPs – “of trivial moral fibre and an even smaller grasp of the scientific method”

The Cover up report by MPs* - the first in a co-ordinated trinity of Cover Ups - into the ClimateGate scandal at the Climatic Research Unit (CRU) of the University of East Anglia reveals more about the MPs on the House Of Commons Select Committee on Science than about the “tricks” of Phil Jones of the CRU whom they “investigated”.

* Andrew Orłowski – The register - <http://climaterealist.com/?id=5462>
* BBC – Roger Harrabin <http://climaterealist.com/index.php?id=5461>

“The MP's report gives a feeble 'ticking-off' of the anti-scientific vandalism perpetrated at the CRU of UEA. It appears the MPs – apart

27-31 MAR / 1 APR BC = 70%
Solar Factors: Significant SWIP 27th-29th & also 31st / 1st Apr
Likely possible weather map scenario: Cyclonic/Northerly with Atlantic ridge receding and fronts from North West (& deep low attack from NorthWest) later.
Heavy showers & windy turning wintry with significant snow on Scottish hills.  Wet, windy & hail with sleet spec in NW, cold.
Heavy showers & windy. Hail, sleet & snow in North.
Moderate / strong later in North / West.
Cold
Cloudy / dull

from the dissenting voice of the one scientist MP involved (Graham Stringer MP –WELL DONE!) – are of **trivial moral fibre and have an even smaller grasp of the scientific method**”, said Piers Corbyn. “If their novel approach to data were applied in credible science and engineering, not a plane would fly, not a mobile phone function and our long-range forecasts would remain a dream. Indeed mankind would still be in the stone-age”.

Lies rule OK! - Data fiddling “common practice”!

Astoundingly the Committee (chair Phil Willis MP) concludes

“His (Phil Jones’) actions were in line with common practice in the climate science community”.

“THIS statement”, said Piers, “is the only really meaningful thing the MPs said and it is of course true. To them it

means Phil Jones should return to his post as Director of CRU; to honest scientists it means the practices of the world establishment of *Climate ‘Science’* are corrupt to the core and the CRU, the UN Climate Committee (IPCC) & all associated Climate alarmist and science fiction operations should be closed down”.

Although it was outside the remit of the Committee to examine “the science” the MPs couldn’t resist the chance to voice their baseless dogma which of course was faithfully trumpeted by the BBC’s Archbishop of The Faith of Man-Made Climate Change - Roger Harrabin. They said **“We found no reason in this unforunate episode to challenge the scientific consensus that global warming is happening and is induced by human activity”** (NB it’s not clear if the bishop is leading the flock or the flock the bishop).

Since the MPs weren’t supposed to be looking for that evidence they wouldn’t find it, any more than I would find such evidence either way in an Argos catalogue. The statement itself is a treble lie:-

1. **It is not a scientific consensus.** It is the baseless belief of a self-interested clique of ‘experts’, financial traders, the oil and coal industries (who want high energy prices) & governments**.
2. **Global Warming is over.** The world has been cooling for 8 years - eg using satellite data rather than CRU etc fraudulent data which admits cooling but to a lesser extent** while CO2 has been rising.
3. **It is not induced by human activity.** All data evidence shows no connection**.

EVIDENCE EVIDENCE EVIDENCE – That is THE question

“In the end”, said Piers “all the huff & puff about e-mails and “tricks” is a diversion to avoid the real test of science – which is to **test theory against observational evidence**. The hypothesis of man-made climate change is refuted by the facts, and there are a number of known reasons in Physics why it fails”.

WeatherAction forecasts should be on TV!

Hilary Benn Minister of Environment has still not replied to Piers Corbyn’s offer to help the Government reduce misery and save lives by providing detailed forecasts to let them know if floods will deluge the UK again this summer - <http://www.weatheraction.com/docs/WANews10No10.pdf>

“If the Government take our forecasts we could make them free to the public and the BBC”, said Piers. **“Surely this is a no-brainer. The Met Office can’t do it but we can.**

However Mr Benn like all the major parties puts Global Warming dogma before duty to serve the public. I urge people to lobby politicians & the BBC on this. Loads of people want to see our detailed forecasts on TV”.
