# Killer tornado USA & major thunder Italy verify Weather Action warning

**Solar driven weather  
extremes 21-25 April  
confirmed around world**

**A series of major thunderstorms & tornadoes culminating in a giant tornado 24/25 April lashed 17 counties in SE USA with top winds of 150mph and killed at least 10 people -**

<http://news.bbc.co.uk/1/hi/world/americas/8642446.stm>

This very major event and a series of thunderstorms in **Italy** <http://bit.ly/bcKZEy> and other parts of S/SE Europe confirmed Piers Corbyn's **specific** extreme weather warnings issued 4<sup>th</sup> April - see right (Tornadoes re USA) for the Major activity period 21-25 April (espec 21/22 & 24/25).

**April 21-25 - Major SWIP esp 21/22<sup>nd</sup> & 24/25<sup>th</sup>** (BC = 70% confidence period)

- Tornadoes espec ~ 21/22<sup>nd</sup> & ~ 24/25<sup>th</sup>

**April 21-25 - Major SWIP esp 21/22<sup>nd</sup> & 24/25<sup>th</sup>**

- Major thunderstorms, hail & local floods - Italy, Balkans, Austria, Czech Republic, Poland.
- Rapid upper level snow melt & avalanches in Alps

Mild weather in the Alps also – as warned - caused dangerous conditions and **avalanches** in the predicted period - <http://www.time.com/time/magazine/article/0,9171,870893,00.html>

## And Tropical storms and Earthquakes...

“Australian Tropical Cyclone Sean formed on 22 April in our warned period 21-25<sup>th</sup> April

**April 21-25<sup>th</sup> - Major SWIP esp 21/22<sup>nd</sup> & 24/25<sup>th</sup>** (BC = 70% confidence period)

- Late Season TD/TS Formation – Coral Sea off Queensland. **Land effect likely**

although it formed in Timor Sea rather than Coral Sea - [http://weather.unisys.com/hurricane/s\\_indian/2010/index.html](http://weather.unisys.com/hurricane/s_indian/2010/index.html)”, said Piers.

“Our warning of a likely increase in Iceland volcano and possible earthquake activity in the period 18<sup>th</sup>-24<sup>th</sup> April was also confirmed for the volcano <http://climaterrealists.com/index.php?id=5575&linkbox=true&position=6> , although the change in rules meant that the flight restrictions were relaxed earlier than otherwise would have been the case!!”.

“There were also some more earthquakes ( $M \geq 5.9$ ) in our warned periods [around 21/22 & 24/25<sup>th</sup> April – 21<sup>st</sup> ( $M=6.1$ ), 23<sup>rd</sup> ( $M=5.9$  in Chile), 24<sup>th</sup> ( $M=6.0$ )]. These were interesting but we cannot say that they are statistically significant because a lot of earthquakes happen around the world.

“There were also **simultaneous significant extreme weather events** in the same solar driven active period 24/25<sup>th</sup> April in India with a massive thunderstorm killing 5 in Assam <http://bit.ly/b0emZk> and unusual extreme turbulent downdraughts causing injuries on a plane <http://bit.ly/byfjfp> .

“World-wide simultaneous extreme weather events are normal and expected in predicted extreme Solar Weather Action periods. This one was important and our solar driven predictions were well verified”, said Piers.

**•The heatwave in most of South Europe and corresponding very warm weather in England – especially the South and East is now on its way for the last 5 days of April – as Piers Corbyn predicted on 17<sup>th</sup> March**

**•“There will be another interesting special events period 29April to 3 May (forecast issued 4 April) where we predicted extreme events (see below) for the first time in Azerbaijan, Israel & Antarctica”, said Piers.**

# NEW TRIAL Special events in Middle East & Antarctic. 3 Events

These Trails have 65% confidence level so probably one of these three events will not clearly succeed or location will be out.

29<sup>th</sup> April – 3<sup>rd</sup> May – especially 2/3 May (C = 65% confidence period) **RED WARNING**

A VERY disturbed period in Middle East with major thunderstorms & dust storms.

- **Major Floods Azerbaijan** - Kura River basin due to heavy rain & snow melt.
- **Major Storm & floods ISRAEL** – South Negev Desert / Red Sea.
- Very disturbed in parts of Antarctica –  
**Major Snowstorms ANTARCTICA** – Murdoch Sound / Ross Ice shelf.

**More on latest forecasting advances & news on combating Climate Change Policy – especially in & after the election – WeatherAction monthly public event Friday 30<sup>th</sup> April 2010 at 12noon Weather Action Office, London Bridge**

On the future of sensible forecast application & Climate Change, Piers said:

**“If the Government after May 6<sup>th</sup> takes our long range – months ahead - forecasts of important Weather situations (and volcano/earthquake risk) we could make them free to the public and the BBC”, said Piers. “Surely this would be a benefit to the public and a help to emergency services – and is a no-brainer. The Met Office can’t do it but we can”.**

“However Minister Benn like all the major parties ignore letters and forecasts from WeatherAction - putting Global Warming dogma before duty to serve the public.

“Right now the three main parties are actually saying less than many expected on Climate Change hype – perhaps because they know opinion is going against them, but they are still engaged in a stupidity parade on the matter - competing for excuses to impose taxes and silly ‘green’ schemes. The truth is dropping the failed theory and policy of man-made climate change is a vital necessity to save £ BILLIONS and help boost the economy into expansion. I urge people to lobby their politicians & the BBC on this during this election campaign in the fight for evidence-based science and policy making”.
