

WANews10no20 MAY 30th Double First for WA & New Tropical Storms USA Fc
PLEASE PASS ON – especially to politicians and media who really ought to know.

www.WeatherAction.com - long range weather & Climate forecasters

Delta House, 175-177 Borough High Street. London SE1 1HR Tel +44207939 9946
From Piers Corbyn+44(0)7958713320 http://twitter.com/Piers_Corbyn , piers@weatheraction.com

Double first for WeatherAction
- predicting **first Tropical Storms of Season** E Pacific & Indian Ocean

Dramatic success (4/4) across world
of long-range extreme forecasts
driven by solar activity 15-21 May

Cyclone Laila forms on cue and smashes into India

• **USA & Europe simultaneous storms, tornadoes & floods confirm Weather Action**

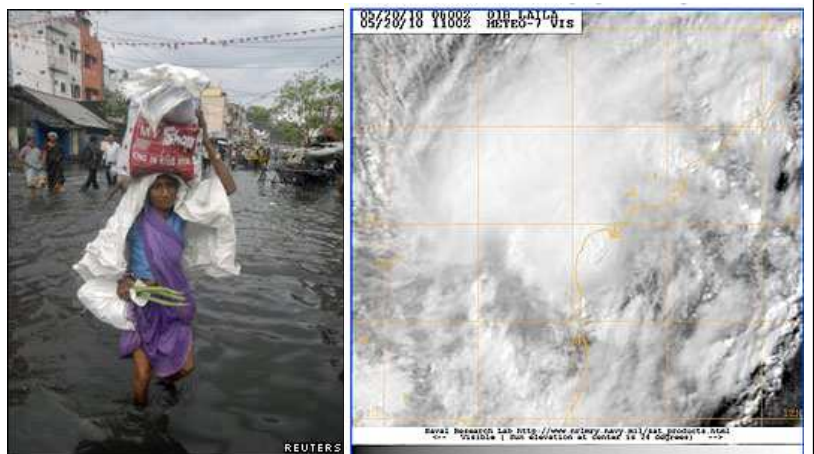

• **Events triggered by Coronal Holes**

• **Guatemala Storm 29/30 May on cue**

• **THREE Tropical storms predicted for Gulf / USA in June**

Piers Corbyn's warning issued May 7th (pto) for Tropical Storm **formation** Bay of Bengal in period 15-17 May was confirmed spot-on. It was caused by a short Special SWIP (Solar Weather Impact Period) which was followed by a Major TOP SWIP 18-21 May driven by fast solar wind from a Coronal Hole on the sun. **Together these SWIPS triggered specifically predicted dangerous storms in South USA and in Europe**

on both sides of the Alps – Germany & Poland (pics right) and NE Hungary (= NW Balkans)
<http://bit.ly/amjIA8>

Tropical Cyclone Laila – The FIRST in the Season for North Indian Ocean formed 17 May confirming Weather Action Long range Storm formation forecast for **Bay Of Bengal** 15-17 May <http://bit.ly/a0HTAu> . At least 23 died as it hit NE India 20/21 May <http://bit.ly/9drC4a>

Awesome storms + tornadoes Texas 19/20 May confirmed WA long range forecast for South USA. Pic by Storm chaser Paul Downes <http://bit.ly/df9GU6>

Simultaneous massive floods hit Germany, Poland & many parts Europe killing at least 9 <http://bit.ly/9IULQC> , <http://bit.ly/a4Uthw> & confirming WA LR forecast.

It's not CO2!

Piers Corbyn was congratulated for his success at WeatherAction's regular last Friday of each month Report Meeting 28 May – which this month hosted a superb presentation by **Professor Bob Carter of James Cook University Queensland Australia** on his new book.

Prof Bob Carter calls for more national & international action to tackle natural disasters.

Piers said “We are very pleased with our (4/4) success rate for key aspects of these very important events which we again show are driven by major events on the Sun and **nothing to do with Carbon Dioxide.**”

“Bob Carter is absolutely right in his book to call for proper concerted national and international Organisations & actions to prepare and act on all natural disasters. Our advancing power - which has been particularly enhanced and is being further improved with very recent advances in our solar-based forecasting, must become a vital part in making this project into effective reality.

“I strongly recommend Bob's excellent book: Climate – The Counter Consensus” (see Stacey International link via <http://bit.ly/9GnKKW>)

Coronal Holes drive Solar wind changes which trigger PREDICTED thunder, tornadoes & floods!

The Chain of events – 1, 2, 3

1. Coronal Holes – Again! observed on May 17th were the main triggers for the predicted extreme events in the SWIP 18-21 May.

See <http://spaceweather.com/archive.php?view=1&day=17&month=05&year=2010>

The NOAA warning of May 17th was: - *A solar wind stream flowing from the indicated coronal hole could reach Earth on or about May 20th.* Credit: STEREO-B Extreme UV”

2. Increases in Solar & Geomag activity

as the extra excited solar wind strikes Earth's magnetosphere and ionosphere. Many other sub-events such as new Solar flares alongside Coronal Holes and ionospheric disturbances associated with extra geomagnetic activity also occur:

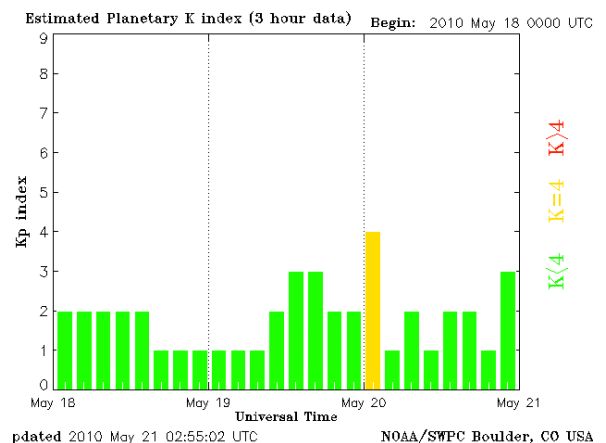

<http://www.swpc.noaa.gov/ftpdir/latest/DSD.txt>

http://www.swpc.noaa.gov/ftpdir/warehouse/2010/2010_plots/kp/20100520_kp.gif

3. Jet Stream Shifts & Weather

in consequent predicted **SWIPs** (=> SLAPs – Solar Lunar Action Periods) -

Visit http://squall.sfsu.edu/scripts/nhemjetstream_model.html to construct **movies** of Jet stream development. – Archive-2010-May-16-00z-6days-6hrs (steps) Major jet stream extra thrashing around and also polar activity are apparent 18th/19th.

The First & deadly East Pacific Tropical Storm of the season formed 29 May - predicted by WeatherAction to within a day & pounded Guatemala - <http://bit.ly/9tHQQH> , <http://bit.ly/aTRLu0>

THREE Gulf/Atlantic Tropical STORMS are expected in June: Start Jun/31 May, Mid Jun & end Jun said Piers at WeatherAction meeting – Details released to customers + more info with updates through month - [link below](#):

Pretty lousy summer for Brit & Ireland <http://www.dailyexpress.co.uk/posts/view/174037/Weather-Expert-predicts-wet-and-lousy-summer/>

MAY 15-17th - **Short EA SWIP** (BC = 70% confidence)

- NORTH INDIAN OCEAN TD/TS Bay of Bengal perhaps off Burma. Storm & Deluges BANGLADESH/BURMA HIT likely

MAY 30-31st **Major (α Δ type) SWIP Red Warning** (BC=70% Confidence)

- ATLANTIC REGION. Powerful thundery Lows over Florida and possible ATLANTIC TS/Hurricane Formation prob to East of Florida tracking away from land into Atlantic. **FIRST Atlantic Storm of the season**
- EAST PACIFIC TD/TS close to Mexico. Land effect likely.

MAY 18-21 Sharp (α type) SWIPs Red Weather Warning esp 18th & 21st. (BC = 70% confidence period)

- Severe deluges, FLOODS, hail thunder and tornadoes MidWest, South-central & SE USA.

MAY 18-21 - Major SHARP SWIP TOP (α type) especially 18th & 21st. RED WARNING

- Most of Sweden & Norway (inc Nordpool area), Denmark, Germany, Low Countries & most of France, Switzerland. Heavy thundery deluges hail and local floods and tornado events in places.
- Italy, Corsica, Sardinia, Gulf of Genoa, NW Balkans, Switzerland. Major thunderstorms, waterspouts /tornadoes likely, local floods.

WeatherAction extreme events forecasts for periods 15-21 May, plus for 30-31 May Trop storm Formation. (Trop Storms fc issued May7, USA issued 13 May, Europe issued 2 May.
