Brit & Ire Forecast Notes
Nov 2009 to Feb 2010

Delta House, 175-177 Borough High St, London SE1 1HR Tel +44(0)20 7939 9946 www.weatheraction.com

Summary Britain & Ireland Long-Range Forecast Notes
Nov 2009 to Feb 2010 SWT25d(i)
Details with maps in production to follow shortly
From Piers Corbyn 23 July 2009

Jan 2010

Cold snowy espec in N & East arctic blasts from North in first half

with DETAILED TIMING of Snow & blizzards prod later

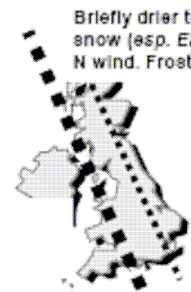

(Full Jan detailed forecast in 10 time sub periods: <http://www.weatheraction.com/member.asp>
Full details are normally produced at least 30 days ahead)

And Red Warnings that snow would be heavier than Met Office/TV forecasts in predicted short periods* (eg Jan 2/3, 5/6, 8/9..... (timing normally correct to 1 day)

• **These periods are called SWIPS = Solar Weather Impact periods and mean that snow amounts will be two or three times levels predicted by the Met Office computer 24 hrs ahead*.

This means that snow due on 5/6th in England will not be the 10inches* tops predicted by Met Office but more like 2 Feet.

• Piers Corbyn astrophysicist of WeatherAction warns that their forecast graphs show the period **Frid 8th & weekend 9/10th are likely to suffer even greater blizzards & snow deluges.**

4-7 JAN 10 A = 85% Same scenario as 45d SWT25E
Red Warning TOP SWIP espec 5/6th Major increase in frontal activity, precip, thunder 5/6
 Briefly drier then heavy snow (esp. East) & bitter N wind. Frosty.
Widespread snow & blizzards with gales / sev gales in Scotland, NE England & N Sea. BITTER WINDS in North & East. Less snow and wind in Ireland & West.

How much colder would you like it, Minister?

As the UK & Europe reel under more deluges of ice & snow Environment Minister Hilary Benn launched 5th Jan an initiative for good farming practice and **Emission - CO2 - Reductions!** He believes CO2 causes warming so one must ask: *How much colder would he like it to be?* His initiative would be *hilarious (!)* but for the fact the religious belief in the **failed & false science of man-made Global Warming /Climate Change** and consequent policies and the stupid Met Office Global Warming - 'mild winter' forecast are causing suffering & death. Low salt stocks consequent to Met Office mild winter forecast have left roads unsalted causing crashes - some fatal.

WHEN will Govt & Emergency services use long-range forecasts that work? How many more must suffer or die for the Global Warming Religion?
