8 Jan 2010

Dear Hilary,

Well done to you & Gordon Brown on prompt and decisive action to cope with this big freeze crisis.

However you need to be aware that **this very cold weather was predicted 6 months ago** by WeatherAction long range forecasters and if the government were to use our forecasts there would be **no need for the UK to run out of road salt** - the consequences of which is suffering and death. We also predicted the extreme conditions in all the previous 4 extreme seasons (ie summers 07, 08, 09 & winter 08/09) for which the Met office forecast the opposite and left you, the Prime Minister and the UK misled and unprepared.

Our forecast for Jan is attached along with another pdf concerning our warning first issued 6 months ago.

If you wish for further advice on:

- 1) When the TV /Met office short range forecasts will underestimate snow,
  - 2) When the bitter cold weather will end and how,
  - 3) When it will return and details of what will happen in Feb ;
- then please get in touch.

I hope you do not wish the UK to suffer any further unnecessary damage, disruption and deaths. It is in your hands to make the best use of scientific advances and the resulting revolutionary forecasts which we provide.

Thank you

Piers Corbyn
