

As some New Yorkers complain IRENE wind warnings over-hyped Piers points out:-

“Wind warnings for NY & East states somewhat overhyped because IRENE Eye tracked further East - in line with WeatherAction ‘EndGame’ forecasts.

“Use of our forecasts could help authorities respond better”

- **Floods and tornadoes now main dangers**
- **Will US Authorities use the best available forecasts to reduce disruption and save lives?**

New York Mayor Michael Bloomberg and others might be forgiven for what has been described as over-reaction to IRENE – which was one hell of a storm for many but not as bad as billed for most New Yorkers – because he has to follow official advice.

The key problem was that official forecasts for Irene had it tracking slightly to the West of New York City (see below left and note earlier official projections were even further West – see eg in WANews12 <http://bit.ly/puvNX3>) which could give extremely strong onshore winds; whereas Piers Corbyn of WeatherAction.com consistently stated in his ‘Irene EndGame’ (IEG) comments that the storm centre would track relatively a bit further East; which it did. See satellite pic below where there is some eye disorganization as it makes landfall but the quasi centre(s) are east of the original official track and heading into Long Island and the **main New York winds were offshore rather than onshore and weaker.**

Irene Facts

- Irene formed & developed as defined by date region & track in Piers Corbyn’s Weather Action whole Season Atlantic Storms forecast detail issued **7 weeks ahead** - WANews12 <http://bit.ly/puvNX3>
- Then IRENE track shifted right (to east) and powered up, compared with standard forecasts one day ahead, as warned in Piers Corbyn’s ‘End Game’ forecasts - IEG1 & IEG2 <http://bit.ly/qv2YJk>
- IRENE consistently tracked somewhat east of Official projections **in line with Piers Corbyn’s ‘EndGame’ forecasts** thereby reducing onshore winds in East states.

Floods & Tornadoes

There have been some tornadoes and tornado warnings with Irene. Subscribers to WeatherAction’s 30day Extreme events Rest of World forecasts (for **RTQ - Red** warnings, **Tornado/thunder & earthquake risk**) expected them (Aug extract here). Similarly the USA Earthquakes just preceding the Aug 24-28 period were consistent with the extra Quake-Volcano, QV, period ~24-28 predicted.

24-25	Extra Top Red	Very High Thunder & strong wind and extra Tornado risk	24-28 QV Major Extra Earthquake and Major Volcano risk
27-28	Top Red	High Thunder & strong wind + extra Tornado risk	

We are offering WeatherAction Long Range Storm forecasts to US Authorities <http://bit.ly/nFJaV1> to help emergency services and save lives.

Some blogs suggest US authorities hype-up all extreme weather attempting to justify their silly claim that so-called CO2-global-warming-causes-extreme-events <http://bit.ly/qN83dE> If they ignore our offer to help reduce suffering and save lives this will be why.

Long Range Tropical Storms forecasts NOW released!

Subscribe US/Atlantic Region, Sept only or Whole Season to Nov!

As Weather Action forecasts on Hurricane Irene continue to heat all corners:-

WeatherAction offers US Authorities advice on Irene and all Tropical storm threats to USA

USA citizens can see that WeatherAction forecasted the formation timing and track of Hurricane IRENE – the most dangerous East USA storm for many decades – from 55 days ahead while all others had no clue. Furthermore WeatherAction’s ‘EndGame’ forecasts have consistently improved on official forecasts of IRENE’s track in its final days, advice which if applied can reduce worry for millions and concentrate aid in the most vulnerable areas.

WeatherAction Letter to National Weather Service Center (NOAA), copied to Dept of Homeland Security – Janet Harbeck, FEMA, and New York Mayor Michael Bloomberg:-

Dear Sirs, (ETA: Various @INDIGNOUS) I have written and am happy to see in your NOAA as indicated in my previous letter, have made a game changing change to help the people of the USA. Myself, Piers Corbyn, and my team at WeatherAction.com have been able to provide you with accurate information on the formation timing and track of Hurricane IRENE. We have been very successful in the past in providing accurate information on the formation timing and track of Hurricane IRENE. We have been very successful in the past in providing accurate information on the formation timing and track of Hurricane IRENE. We have been very successful in the past in providing accurate information on the formation timing and track of Hurricane IRENE.
