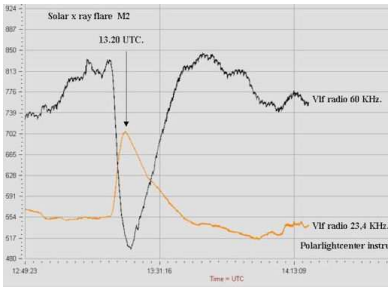
Dec 31 Solar-ionosphere hit, mild-storms UK, cruel snow blast USA and Japan major quake confirm WeatherAction long range forecast

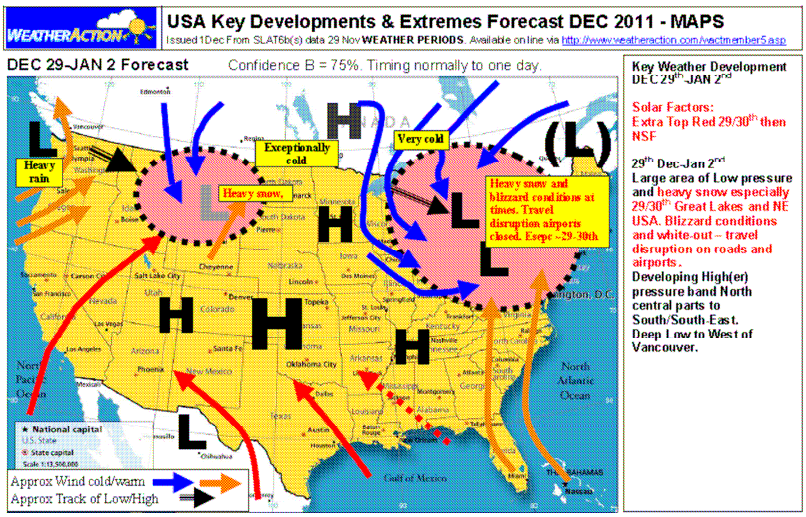


The New Year blinding snow squalls and white-out in NE USA which caused massive travel disruption, the mild storms in NW UK and increased earthquake activity around the world (eg the M6.8 quake near Japan Jan 1) were all predicted by Piers Corbyn of WeatherAction long range forecasters for this period and he publicly warned of the USA cruel cold blast from 10 weeks ahead to within a day.

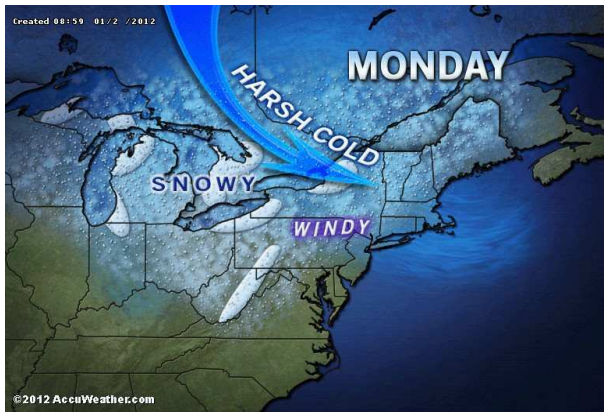
The weather events and the associated sudden ionospheric disturbance (top) were driven by M2 Class Solar flares from Active Region 1389 (See http://climaterealists.com/?id=8904) and their effects and effects of other factors were predicted by WeatherAction's Solar Lunar Action Technique SLAT6b(s).

Piers Corbyn's warning at Congress of Brilliant Minds Oct 19 in Madrid brilliantly confirmed by cruel cold blast USA from New Year's Day! – http://www.accuweather.com/en/weather-news/blinding-snow-squalls-during-c/59781 http://www.mlive.com/news/grand-rapids/index.ssf/2012/01/first_snow_of_year_welcomed_by.html

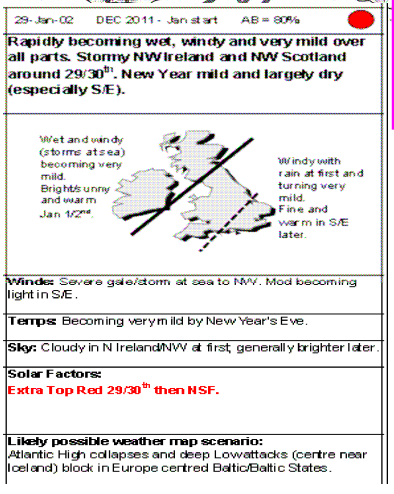
ALL the extreme events in Accuweather Annual Review 2011 were predicted in long range by WeatherAction http://bit.ly/vtsJHQ

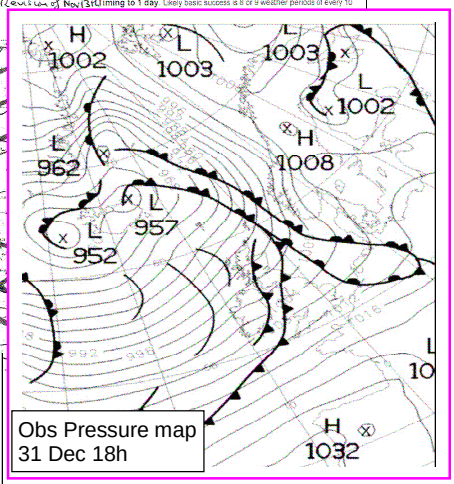


Left. WeatherAction month ahead USA Maps/extremes forecast available on line **http://bit.ly/utWrvj** & confirmation below.



Atlantic-Europe Pressure Forecast ~29 Dec to ~2 Jan and what happened





"Blinding snow squalls" at times in Pennsylvania (above) and Cincinnati led to multiple car pile-ups Mon 2 Jan.

Major Earthquake Extra Risk trial

Around 29-30 Dec Top risk for **major Quakes**

29-30	**Extra Top Red enhanced**
Qv Major Extra Earthquake and extra Volcano risk	

Observation :
M6.8 Jan1 05:28 UTC, IZU Islands South of Japan - largest quake in the last 30 days. http://on.doi.gov/axFKqC NB more data is needed before full assessment.
