

# Earth-facing Coronal Holes, Quakes+Volcanoes and major storm events confirm Solar-Lunar forecasts 18-21 May

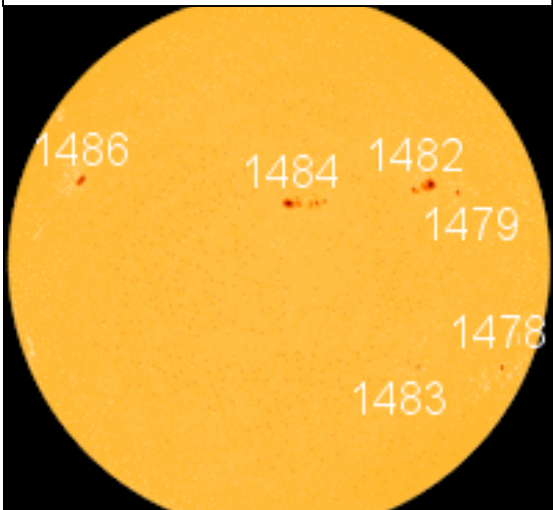

**THREE significant Volcano events (Guatemala, Indonesia, Hawaii) and THREE M6+ Earthquakes all in 18-20<sup>th</sup> May confirm WeatherAction QV warnings 18-20<sup>th</sup> May (Rt)**

circulated 1 May. Quakes were 18<sup>th</sup> M6.2 Chile and 20<sup>th</sup> M6.0 Italy & M6.0 Japan - <http://on.doi.gov/1AJnQ6> Although not the M6.5 level deemed 'quite likely' 3 of M6-6.2 is worth more than one M6.5. Volcanoes: below and <http://frenchtribune.com/teneur/1211275-mount-marapi-volcano-erupts-again> , <http://hawaii.volcanodiscovery.com/hawaii/kilauea/current-activity.html> . Current newly ACTIVE volcano lists: <http://bit.ly/Lal2Qd>

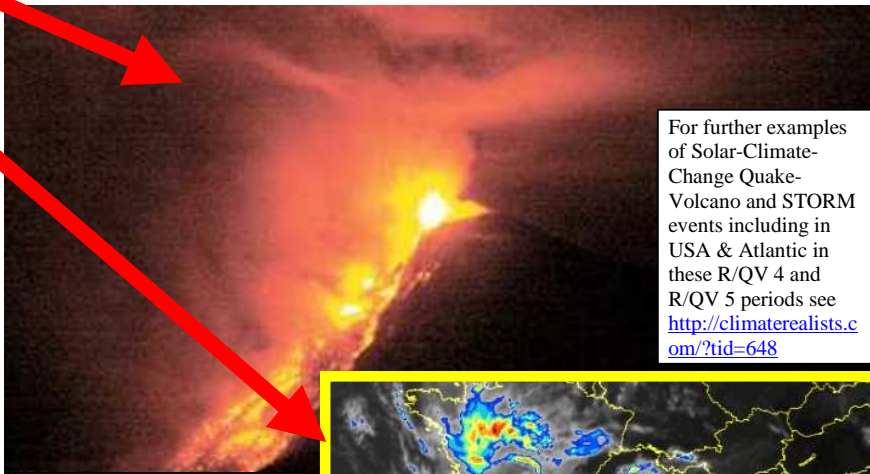

19-21	R4	V High	V High	18-20 QV4 Extra Major Earthquake & Major Volcano Earth facing Coronal Holes/active regions likely near central longitude of solar disc Quakes M 6.5+ also quite likely. Pacific ring - South Hemisphere probably preferred.
23-25	R5	V High	V High	23-25 QV5 Extra Major earthquake & Major Volcano Earth facing Coronal Holes/active regions likely near central longitude of solar disc Quakes M 6.5+ also quite likely. Pacific ring - NEAR EQUATOR or just N of probably preferred.

Earth facing on Central longitude \*Coronal Holes 20<sup>th</sup> May also Earth Facing AR1484 - large although not flaring on day: <http://bit.ly/JwOITI> \*Confirm predictions.

The Solar-Lunar Action Technique predicts special Earth Facing Coronal Holes / Active regions which drive Earth events even though standard approaches may not deem them important.

For further examples of Solar-Climate-Change Quake-Volcano and STORM events including in USA & Atlantic in these R/QV 4 and R/QV 5 periods see <http://climaterealist.com/?tid=648>

## More Extremes coming

WeatherAction long range forecast for ~19-21<sup>st</sup> May N Italy, France, Switzerland & much of Germany was for *blustery showers, thunder & hail*. Storms (bel L) in Italy & Med May 20-21<sup>st</sup> & onwards are in line with this and a precursor or early expression of the worse WeatherAction WARNING -22-25<sup>th</sup> (to 1 day) MAY below. (EuroMaps fest via <http://bit.ly/utWrvj> ). This foreshadows short range MetO forecast for active Lows France-Italy-Med eg 22 May <http://bit.ly/JnVAm> .
