

# The bogey Lie of Ocean "Acidification"

- **AND the Methane scare** - Hysterical research grant scams
- CO2 in sea & air is the gas of life, not a pollutant

## Inconvenient Facts

1. Sea life did not die out – it boomed - in Jurassic and Devonian times & before when CO<sub>2</sub> was 5x and 10x present.
2. Sea CO<sub>2</sub> is over 50x that in air. The ratio (partial Pressure of CO<sub>2</sub> / sea concentration) is fixed by Henry's Law
3. The idea that atmospheric CO<sub>2</sub> can ever significantly change sea CO<sub>2</sub> in the real world is a LIE propagated by politically deluded fools in the media and charlatans in academia.
4. The relationship is the other way. Increasing sea CO<sub>2</sub> from undersea volcanoes can increase air CO<sub>2</sub> and the bounteousness of plant life.
5. In a sci-fi model of the world, all air CO<sub>2</sub> shifted into the sea could only increase its concentration by 2%.
6. *The methane (CH<sub>4</sub>) bogey*, is similar fiction. Nothing happened in geological times when all tundra melted. CH<sub>4</sub> is anyway removed by methanotrophic bacteria in soil.
