WeatherAction Solar Factors ('RTQ') forecast R5 4-6 Nov (+/-1d), yellowed Left on Haiyan/Yolanda record **Storm track including Philippines + R5 => Power Up**

For all the 3* R5 periods this year which occurred while a Tropical Storm/Typhoon was on a track including the Philippines the storm powered up to its highest category during that R5. *Nari, Haiyan/Yolanda, TS30, see http://weather.unisys.com/hurricane/w_pacific/2013/index.php

“But for our R5 this would have been a more normal typhoon”, said Piers Corbyn astrophysicist of WeatherAction.com. “Our forecasts can help make better warnings. The idea that this tragedy was anything to do with CO2 and the fictional Man-Made Climate Change is a baseless lie which holds back science which could help potential Typhoon victims and serves only those playing the pathetic, shameful ‘CO2/Climate Reparations begging bowl game’ – a fraudulent gravy train.”
