

As Wild Jet stream / Mini-Ice-Age warnings & predictions are confirmed Warmists go Goebells-esque

## 'Climate change link to storms' is Delusional, Dame Julia Slingo is a charlatan

### • WeatherAction challenges Dame Slingo and Met Office to 'put-up or shut-up' debate

The carefully orchestrated fanfare that "(Man-made) Climate Change is likely to be a factor in the extreme weather that has hit much of the UK in recent months" is opportunist delusional nonsense - assertion without evidence or rational basis (1).

The key document (2) used by Dame Slingo is an interesting, if one-sided, DESCRIPTION of weather events over the last few months but contains not a shred of evidence that changes in CO2 (by man or nature) has had any observational affect on the recent weather or indeed European or world climate ever in the real world.

(1) <http://www.bbc.co.uk/news/uk-politics-26084625> (2) [http://www.metoffice.gov.uk/media/pdf/n/i/Recent\\_Storms\\_Briefing\\_Final\\_07023.pdf](http://www.metoffice.gov.uk/media/pdf/n/i/Recent_Storms_Briefing_Final_07023.pdf)

The assumption by the publishers is that the public and politicians and journalists of limited diligence and logical powers will be overwhelmed by the barrage of graphs and description which they will not read and simply accept the OPINIONS which do not in fact follow from the report content. **They might just as well have presented a telephone directory as evidence for their delusions.**

Porthcawl South Wales, 8 Feb in one of the storms LR predicted by WeatherAction

## 1. There is NO EVIDENCE for CO2 Warmist claims

LAST YEAR Julia Slingo and various bishops of the CO2 warmist sect claimed the cold and snow of the UK was (likely) caused by '(Man-made) Climate Change' / Warming. THIS YEAR they say such warming is causing this mild and very wet and stormy winter. This means they can and do assert anything they like AFTER the event (note their models expected a dry winter). However one core problem is – the UN Climate Committee (the IPCC) admits there has been NO WARMING in recent years – indeed there has been a 'hiatus' they say for the last ~15 year (a drop in real honest, unfiddled data).

**So: Warming which does not exist causes anything they care to claim!**

## 2. The Jet Stream is the arbiter of extreme weather and real natural climate change yet the CO2 theory cannot explain or predict its recent wild behavior.

Paragraph 3 of Slingo's key Weather description telephone directory (link 2 above) says:

*"The North Atlantic jet stream has also been unusually strong; this can be linked to exceptional wind patterns in the stratosphere with a very intense polar vortex."*

**SO, What causes these patterns in the stratosphere & polar vortex? Answer NOT CO2, but Solar activity.**

At the UN Climate Committee Report meeting at the Royal Society on 2/3 Oct 2013 it was explicitly reported by presenters that the CO2 models could not explain the wild behavior of the jet stream. At which point Piers Corbyn pointed out it was a direct consequence of changing solar activity (and lunar modulation) and generally predictable - so obviously nothing to do with CO2. 'Sudden' winter warming of parts of the stratosphere are known to precede extra wild behavior of the Jet stream and this winter Piers Corbyn specifically predicted such from solar activity and what happened since is weather and climate history unfolding – nothing to do with CO2. His WeatherAction forecasts also predicted the extreme cold USA blasts of the 'offset' polar vortex and the all the main serious storm hits in Br-Ire N Atlantic since October.

### Polar Vortex confirms WeatherAction

"I explained how we predict how the Sun changes the Jet Stream and polar Vortex – nothing to do with CO2 - and that these Wild Jet Stream - Mini Ice Age conditions are here for 2 decades. ABC tv showed examples of our proven skill and got someone from NASA to comment. However the 'expert' refused to play a useful role and his remarks were so diabolically unprofessional, anti-scientific, rude and dishonest that we are taking the matter further. He was also bizarrely intent to 'select' (distort) reports on USA cold to underplay its significance - presumably to please his CO2-warmist bosses".

• Piers Corbyn was interviewed for abc tv following WeatherAction's highly successful USA Can Dec+Jan forecasts.
