Mid-April snow confirms WeatherAction USA

• Detroit breaks top snow record of 1880-81

The cold blast in East parts and the rather unusual late snow which hit N/E USA mid-April well confirmed WeatherAction USA+S. Canada forecast issued Mar 31 and broke 133yr old Winter-Spring season snow records. <http://www.webpronews.com/detroit-snow-record-broken-flood-warnings-in-effect-2014-04>

Mini-Ice-Age has begun

“Well done!”, said WeatherAction forecast subscribers who were also warned and prepared for all major weather extreme events through WeatherAction’s predicted CRUEL WINTER and COLD SPRING N/E USA (Feb forecast p1 extract below). “The Mini-Ice age we predicted some years ago has begun”, said Piers Corbyn. “More and more across USA and Canada are seeing the need to sign up to our revolutionary Long-Range forecasts which are giving world-leading advice to agriculture, businesses and families in America and around the world.”

WEATHERACTION USA Key Developments & Extremes Forecast FEBRUARY 2014
Summary & News. Detail p2-10. All forecasts via www.WeatherAction.com. Produced Jan 31 from choices Jan 16

FEB & 1 Mar 2014 SLAT 9A, USA+S.CAN
Maps & full details of timing / regions of events: p 2-10

CRUEL WINTER CONTINUES
Bitter cold and massive snow N, N/E & Center while far SW & W often very mild

- Coldmageddons' & 'Snowmageddons' on & on
- Far West mild; NW often showery / wintry mix.
- Rockies mostly dry, bright & cold.
- Three periods of most dangerous snow/cold blast/ storm events:
Feb ~3-7th (R3, R4), ~10-12th (R5), ~23-25 (R5)
RAREs probably associated with major Earth-leading solar Active Regions & for large Coronal holes - see WeatherAction TITOT (Red Weather, Thunder, Quakes) / Extreme Events forecasts.
- Basic approx Pressure developments Details p 2-10
-1-12 Somewhat mobile 1-2nd changes to very cold snowy blasts with Lows N/E and Higher pressure NW to S / SE; V mild SW
-13-18 Active lows charge NNE parallel to E seaboard from Gulf to NE - heavy snow.
-20-Mar 1 Somewhat more mobile. Still cold & snowy N/E but cold blast not extending so far South. Far West still mild.

The changes in circulation giving these extreme weather patterns will be driven by changes in the Solar-Lunar factors which govern the behavior of the jet stream and are predictable by WeatherAction's revolutionary Solar-Lunar-Action-Technique (SLATSA) months ahead and nothing to do with CO2 changes - the 'Climate Change' theory, which is delusional and fraudulent. The wild extremes are

Polar Vortex confirms WeatherAction

The basic N/E vs SW right well-forecast by Weather-Action for specific 'snowmageddon' & 'coldmageddon' spells in Jan will continue through much of Feb.

HOWZAT! WeatherAction 4week ahead Forecast map -26-29 Jan matches AccuWeather Report 27/28 Jan for continuing 'Polar Vortex' blast. The SUN drives weather extremes & Climate! <http://www.weatheraction.com/docs/WANews14No12.pdf>

EARLY THIS WEEK

• Piers Corbyn was interviewed for abc tv following Weather-Action's highly successful USA/Can Dec-Jan forecasts.
