

This is <http://www.weatheraction.com/docs/WANews14No16.pdf> **R5QV5** 2-4 MAY confirmed (period defined 14 April)

Floods central Italy confirm WeatherAction EuroMaps Forecast

- Region detail for **R5** period 2-4 May impressively confirmed

The dramatic floods in the Adriatic port, Senigellia, Central Italy 4 May and, eg, Bosnia across the Adriatic, were a confirmed predicted consequence of the WeatherAction Solar extra-active and **R5** period 2-4 May. VIDEO:

<http://weatheraction.wordpress.com/2014/05/05/watch-italy-under-waters-no-comment-on-youtube/> .

BBC Coverage - which of course did not mention that such floods were explicitly predicted by WeatherAction* - played their usual Goebells-esque extremist innuendo story to tweak the "All-extremes-are-CO2-extremes-Oh-please-let-me-pay-my-Green-taxes-now-to-save-the-planet" implants they have washed into the brains of millions. *Imagine if Al-Liar-Gore predicted anything that happened they would trumpet it from TV towers world-wide. WeatherAction does it every day and is black-listed.

The **R5** May 2-4 has been confirmed in, eg, Weather Extremes, **M6.5+** Quake(s), Earth-facing Solar Coronal holes & Active Regions, fast solar wind & increased geomagnetic Activity, See: <http://www.weatheraction.com/docs/WANews14No15.pdf> , W-A blog <http://bit.ly/1u319Z2>
