AMAZING WILD WEATHER LIMITED TIME ONLY OFFER

[www.WeatherAction.com](http://www.WeatherAction.com)

- 6 months for 3 !
- 12 months for 6 !

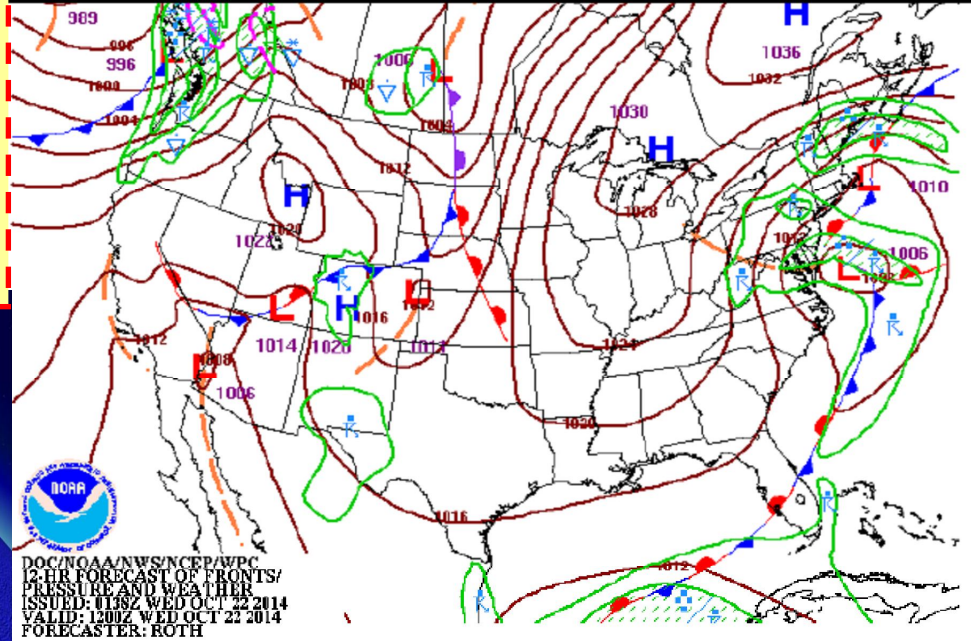

**OCTOBER 19-23 Forecast** Confidence AB = 80%. **Timing normally to one day, positions approximate.**

**Key Weather Development OCTOBER 19-23**

- Solar Factors:**  
 R3 19-20; R4 21-23  
 High pressure retreats to NE with a ridge maintained for a while in East-center. Low on East coast. Active lows in West North + West South. Probably high to N of Vancouver.
- Thundery showers, thick cloud, hail on East coast.**
- Mostly (but not entirely) dry + bright in East parts away from coast. SW Gulf /Texas & OK extreme wild fire risk.
- SW + South California major thunderstorms, giant hail, local floods.**
- West coast mostly dry with high cloud. NW coast probably cool + showery with hail + thunder.
- North Plains and West-Center thunderstorms, tornadoes, giant hail, local floods, snow in parts.**

**Above:**  
**WeatherAction**  
 forecast issue 30 Sep

- Low Nth, High MidWest, Low East coast.
- Heat centre (also 'warming trend' map left).
- Low Pacific NW, High W coast, Low Sth California.

**Left: Daily (12hr) Weather Map** wed Oct 22 for 12z
