

B+I Late Dec mild+Floods on WeatherAction cue

23-27 December 2014 BC = 70% 

Briefly quieter and less cold than snow preceding heavy rain and storms in Ireland and West / SW Britain – pounding of sea defences later in Ire + SW Britain in a sudden switch to mild weather. **THAW FLOODS.**

Same as 45d.

Winds: Variable then S'y becoming cyclonic / SW'y.

Temps: Turning mild

Sky: Variable then cloudy

Solar factors: NSF 23-24; R3 25-27

Likely possible weather map scenario:

Active Lows attack from W / SW with centres heading for Ireland & Wales / England. High pressure Scandinavia. Low central Med.

Jet Stream: More mobile, Shifted South, strong South component.
