=> Piers Corbyn Astrophysicist:-

## WeatherAction challenges World Economic Forum (#WEF) to honest debate on #ClimateChange

**The World Economic Forum claims to pride itself on "debating difficult subjects" HA-HAH-HA!** Their Climate Change 'discussion' is a parade of Climate Bishops desperately bidding to keep the Man-made CO2 Climate Change Lie going IN THE INTERESTS OF THE WEALTHIEST 1% OF THE WORLD - who have been increasingly reliant on this fraudulent bubble of false value to rob the rest of the world via vast green subsidies and hand-outs from carbon/green taxes, dodgy carbon-trading, phoney green scams and extortionate food, energy and oil prices (but there is a wobble in oil which is why they MUST 'discuss' it).

**Piers Corbyn** says: "The WEF wheel out the deluded Molina Nobel prize holder (Chemistry) to trot-out incantations to the effect that it is unacceptable for society **not** to increase the wealth of the super-rich by suiciding its living standards and well-being in accord with the ClimateChange lie....

..."I debated with Molina at the Congress Of Brilliant Minds Madrid 19 Oct 2011 -

<http://en.elsercreativo.com/brilliantminds/brilliantmindsII> . **MOLINA LOST** the debate, according to people present and evidenced by the fact that **the video was not released**. His contribution was frankly breathtakingly arrogant, stupid, un-scientific and devoid of any evidence to support the warmist case whatsoever. Students present were aghast. His 'argument' was **"IT (Co2 Warmism) is THE OPINION AND THEREFORE TRUE"**. This cretinism is worthy of the Guardian, Independent, NewYorkTimes, BBC and AlJazeera (of BigOilStateQatar) 'Science+Environment' departments but embarrassing for anyone else with a Nobel prize however dubiously gained, the debate host and organisers and sponsors of the Brilliant Minds event.

I simply showed with real data graphs that there is no evidence in the real world that CO2 changes drive world temperatures weather or climate and data shows the relationship is the other way around. **Since 2011 world cooling and world sea ice-amounts have shown smoothed-out acceleration of increases. The CO2 warmist response is to accelerate the level of data fraud - relying on increasingly 'adjusted' (upwards) surface 'measurements' (LOL) rather than more reliable satellite data. SEE:**

[07 Jan 2015 WeatherAction News No 03 #ClimateTruth #NHSWinter event at BBCHO](http://07_Jan_2015_WeatherAction_News_No_03_#ClimateTruth_#NHSWinter_event_at_BBCHO)

<http://stevengoddard.wordpress.com/2015/01/05/ncdc-breaks-their-own-record-for-data-tampering-in-2014/>

**WeatherAction challenges The World Economic Forum to real public uncensored evidence-based debate on so-called Global-Warming and Climate Change; and furthermore points out that if any of the WEF participants actually care a jot about terrible suffering and deaths brought about by extreme weather events they might care to use WeatherAction's provenly skilled warnings of such.**

- The number of private jets screaming into Davos shows #WEF super-rich hypocrisy knows no bounds.

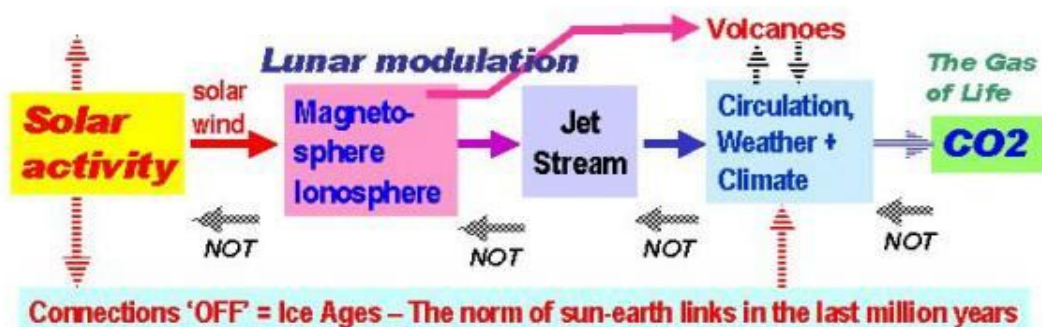

- **THE FACT** is the world is cooling using reliable satellite data and the total amount of sea ice is at record high levels. The truth is opposite to warmist claims.

See above+ and

<http://www.weatheraction.com/docs/WANews14No11.pdf>

- **THE FACT IS ALL** the CO2 warmist claims since 2000 of no-more snow in UK etc, runaway warming, more tornadoes, increase in rate of sea level rise, less sea ice.. ....etc HAVE FAILED.
- **THE FACT IS** that even if the trace gas CO2 (0.04% of atmosphere) had ANY effect the idea that Man's contribution (1/25th of the total CO2 flux in and out of the sea and land every day) to it rules over all other natural changes (Volcanoes, rotting vegetation, termites (who produce 10xMan), etc...) is sub-cretinist.
- **THE FACT IS** sea temperature rules the Co2 levels in the atmosphere because sea temperatures control the amounts of CO2 which go into the sea. The amount of ANY CO2 from any source which could stay in the atmosphere is regulated by the sea so attempts at control are useless. Extra Co2 put into the atmosphere will just be absorbed by the sea - and vice versa - to maintain the temperature dependent

**Solar-magnetic activity with Lunar modulation drives weather, climate and CO2 – NOT other way around!**

**WE HAVE NEVER HAD IT SO GOOD**
