

# DIABOLICAL Cold & Snow

- A direct Result of 'Wild-Jet-Stream' & WeatherAction Top ('R5') Solar-Weather Factors - all warned 3 weeks ahead

FEBRUARY 17-19 Forecast Confidence AB=80% Timing normally to 2 days; positions approximate.

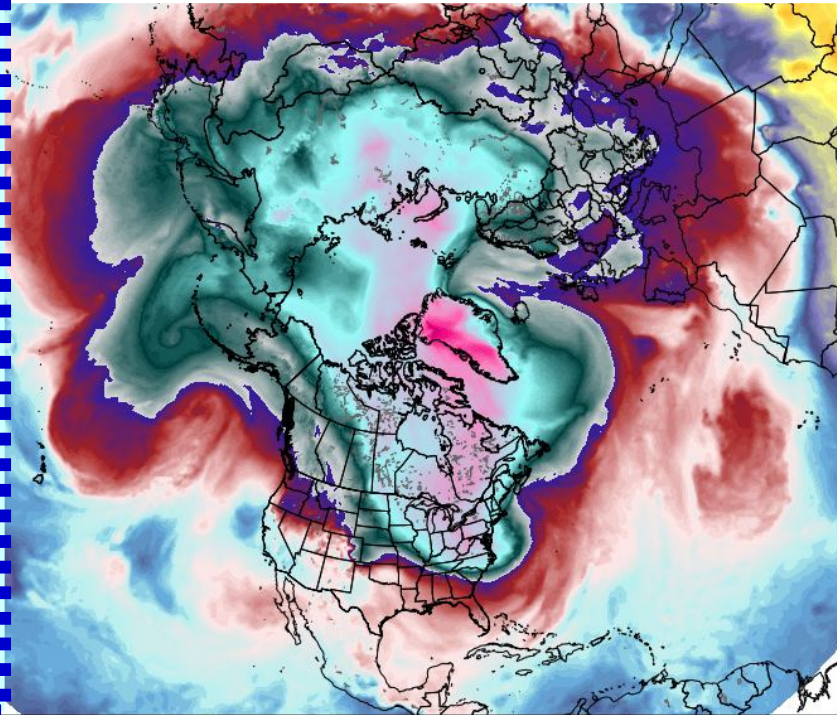

Key Weather Development FEBRUARY 17-19

Solar Factors:  
R5 17-19  
VERY ACTIVE + MOBILE notably more severe than standard models will expect

Approcession of highs + lows moves from Canada to Great Lakes + NE. High to SE. Low South/East Texas. Mostly high SW USA inc South California. Probably low Pacific NW.

A large area of frequent blizzards heavy snow + thunder-snow for North-Center to NE including Great Lakes, Midwest and most of N/E quarter of USA. A BIG ONE.

**SUPERCOLD** Polarr Vortex Greenland to Great Lakes (Rt);  
WeatherAction 3 week ahead warnings of extreme cold & EXTRA snow for ~FEB 17-19 (on top of build-up already predicted) (top).  
Piers Corbyn warned weeks ahead:  
"LOOK OUT FOR 17-19 FEB - What is coming will be more severe than models expect."
