

Claims that 2015 was the warmest ever are fraud

This is PCC1 = <http://www.weatheraction.com/resource/data/wact1/docs/WANews16No12.pdf>

-Piers Corbyn 22-01-16 - [PiersCorbynClimateCard1](#)
 The Facts are: Reliable satellite data shows the world is in a period of #GlobalCooling and has been for some years. The so-called surface data is selected for political purposes to promote the discredited CO2 "Global-warming / "Climate Change". For graphs on these points such as I presented on BBC Andrew Neil show Dec 3rd see right ** and video link for that show. **As pic.twitter.com/K1ISWbMCKq ; & next one about the 0.5degC fraud add-on of temperatures in last decade which he also mentioned. The third graph shows the 60 year cycle in temperatures - showing (arrows) rapid rises happen every 60 years – nothing to do with CO2.

WeatherAction Myth Buster - Redistribution encouraged
They Changed the FACTS!

Warmists have been fiddling ("selecting") data for years -

- systematically removing stations to make the data look colder in the past & warmer now
- BUT Whatever they do, even with 'new' data the WORLD IS COOLING while CO2 still rises
