

via Nikki Comerford, Heartland Institute

Greetings to Heartland 12th International Conference on Climate Change, 2017 at DC.

Top greetings to ICC12! I am really sorry not to be there. It is fantastic after all these years to get the CO2 warmist #FakeScience fraudsters on the run. Congratulations to Heartland Institute which has played such a tremendous role in this success.

The CO2 lobbyists are desperate and resisting and lying like cornered rats. We must relentlessly hammer home the message *CO2 levels are an effect NOT a cause of Changes in Climate* (Temperature) and repeatedly challenge them to **produce real world evidence** that CO2 drives Climate rather than the opposite which all can see.

We, WeatherAction and other UK qualified campaigners have specifically publicly challenged Profs Sir Brain Hoskins, Brian Cox and Stephen Hawking on these lines (see latest on www.WeatherAction.com) and they have failed to produce whereas on anything else they would rush forth with evidence.

The importance of the fight is not only to save evidence-based science, the only science, from the fact-free fraud of #FakeScience.

We also must destroy the CO2 delusion as a key ideological pillar of globalization which was and is used to justify massive de-industrialization such as of the Rust belt of the USA and the north of the UK. Success here paves the way for intelligent energy policies and bringing back jobs. As in the USA; the first major political parties to do this in the UK and Europe will win.

I know some attendees want our WeatherAction forecasts as on previous occasions so I can announce that - as part of our newly available **USA whole summer forecasts** - this summer in USA will see the **continuation of very wild jet stream variations** bringing major contrasts and extremes which are nothing to do with CO2. The first example will be in June when for much of the month, especially the 2nd and 4th weeks North/East parts of USA will suffer a "cold wave" - of notably NON-'global-warming' weather!

Visit www.WeatherAction.com for more inc links to papers, publications and releases.

Thank you

Piers Corbyn
