Spain: Hail and Cold Pool Spot On detailed forecast 25d ahead. UK similar success

WeatherAction gets congrats.

Spain: Hail and Cold Pool Spot On detailed forecast 25d ahead. UK similar success

WeatherAction gets congrats.

Europe inc Scandinavia Nov 2019

6 sections, (to Dec2) - Confidence B 75%. Same Summary as 100d Ahead:

Dramatic early Winter north and much of central Europe! One fine spell centre-NW.

Scandinavia very cold & snowy through most of Nov.

N/W Continental Europe often cold/snowy in first half;
while centre & East / South more dry and fine.

2nd half: West / NW Europe largely fine and quite warm / before turning cold & snowy later; while NE & E Eu cold and snowy turning milder and quite fine late Nov.

- (Near) record extreme cold for November in Scandinavia with major blizzards.
- A number of ~cyclonic (mainly in North) at times "displaced polar vortex" events in Scandinavia and North & N/W Europe.
- Main uncertainties: N/S stretch of polar-type Lows, N/S boundary of most extreme cold and snow / blizzards and extent of warm high.
- Dramatic changes cold⇒warm West Eu. V deep & sometimes narrow Jet Stream "tongues of cold" meanders in (eg) Atlantic/Biscay (Classic Little Ice Age events).

General Changing Climate Factors: Wild-jet-Stream (Little-Ice-Age) circulation with huge meanders and long N-S fetches and significant pressure blocks dominate this month. The South-shifted, lengthened, meandering jet-Stream giving these often-extreme patterns is caused by generally LOW Solar activity and specific changes in Solar & Lunar factors which are predictable by WeatherAction’s revolutionary Solar-Lunar-Action-Technique, now SLAT15b, months ahead. No weather or climate whatsoever is caused by CO2, the levels of which are controlled BY (sea) temperatures, a fact proven by over 500,000 years of data.

European Forecast likely Pressure & Weather for 1st - 5th Nov 2019

Timing to 1 or 2 days (wild Jet stream makes uncertainties). Likely success rate of weather periods is 6 or 7 basically successful of every 8.

Key Weather Development Notes:
1st - 5th November 2019

Solar Factors: R2 (1-5)

Key Developments:
- Cold low BI-Norway sea moves S/SE.
- High SE Europe.
- Snow/sleet (N) Scand + Denmark.
- Showery Benelux, Germany, N Poland, Baltic & getting colder.
- S/E Europe mostly dry, fine + mild.

Jet Stream: Wild meander.

Thunder Risk: Low.

Main Uncertainty: Positioning of BI-Norway Sea Low.
European Pressure-weather maps NOVEMBER 2019

European Forecast likely Pressure & Weather for 6 - 9th Nov 2019 | Confidence B 75%

Timing to 1 or 2 days (wild jet stream makes uncertainties). Likely success rate of weather periods is 6 or 7 basically successful of every 8

Key Weather Development Notes:
6th - 9th November 2019

Solar Factors: R3

Key Developments:
Biscay Low, High East Europe.

N/W Scandinavia snow + cold.
S Scand, Poland, Germany, N Italy Switz showery + mild-ish.
S/E Europe dry, warm/mild & fine/sunny.
Iberia snow on high ground/showers, cold.

Jet Stream: Very deep meander

Thunder Risk: Mod

Main Uncertainty: Position of Biscay Low

Mostly dry + bright

Snow + cold

Variable

Fog

Dry mild

Dry sunny v.warm

CYPRUS: Dry + fine

Snow + cold

Showery

Some showers later

Cold rain + poss sleet/snow

Cold POOL

Showers
European Forecast likely Pressure & Weather for 10 – 15th Nov 2019

Confidence AB 80%

Timing to 1 or 2 days (wild Jet stream makes uncertainties). Likely success rate of weather periods is 6 or 7 basically successful of every 8

Key Weather Development Notes
10th – 15th November 2019

Solar Factors: R3 (10-11), R5(12-15)

Key Developments:
Increasingly active Low (N) BI – North Sea/Scandinavia.

Highs: N Scand; far SE Europe, S Iberia (Azores extension).

Sleet + snow/blizzards Scand + N Germany/Poland.

Variable mid Europe.

Dry + warm S Italy, S Greece + S Spain.

Jet Stream: More mobile / relatively normal.

Thunder Risk: Mod-high.

Main Uncertainty: Position of BI-Scand cold low
European Forecast likely Pressure & Weather for 16 – 24th Nov 2019
Confidence BC = 70%

Timing to 1 or 2 days (wild Jet stream makes uncertainties). Likely success rate of weather periods is 6 or 7 basically successful of every 8

Key Weather Development Notes:
16th – 24th November 2019

Solar Factors: R3

Key Developments:
Large high builds BI Scand expanding into N continent EU.
Lows N Scand + Turkey/S Greece.

Increasingly fine & warm NW Europe + W Scand + Germany;
Cold + cloudy most of E + SE Europe.

Turkey warm (cooler later).
Iberia fine (cooler later).

Jet Stream: Major blocked/split

Thunder Risk: Mod

Main Uncertainty:
Development of high

European Forecast likely Pressure & Weather for 25 – 27th Nov 2019

Timing to 1 or 2 days (wild Jet stream makes uncertainties). Likely success rate of weather periods is 6 or 7 basically successful of every 8

Key Weather Development Notes:
25th – 27th November 2019

Solar Factors: R5 (25-27)

Key Developments:
Very powerful polar Low (displaced polar vortex) N Scand.
High (Azores extension) most of Med.
Snow blizzards storms Scand + Denmark.
Benelux, N Germany + Poland sleet/snow.
S Europe mostly dry + fine.
SE Eu cold.
Jet Stream: Split
Thunder Risk: V High

Main Uncertainty: N/S position of polar low

Extreme cold
Major blizzards
Bitter winds
Blizzards + HAIL
Sleet/snow
Cold rain
Cloudy
Cold + cloudy
Variable sky
Dry fine
Mostly dry + fine
Dry fine quite warm
CYPRUS: Cold + Cloudy

European Forecast likely Pressure & Weather for 28 Nov - 2nd Dec 2019  Confidence B = 75%

Timing to 1 or 2 days (wild Jet stream makes uncertainties). Likely success rate of weather periods is 6 or 7 basically successful of every 8

Key Weather Development Notes:
28th November – 2nd Dec 2019

Solar Factors: R5 (28-30), R3(Dec1-2)

Key Developments:
Very active displaced polar vortex. Low Scandinavia + linked cold pool low west Med. Azores High west Iberia.
High Turkey.

V Cold + snowy Scandinavia, Benelux, Germany, Poland.
Wintry west Med.
SE Eu mostly dry + fine.

Jet Stream: Huge meander
Thunder Risk: V high; mod

Main Uncertainty: Position of cold pool low
