USA Forecast NOVEMBER 2019

Summary & News Page. NOVEMBER 2019 Full 30d(32d) USA Slat15b using BI choices Aug15, 95d ahead [delayed Repro]

USA (inc S Canada) NOV 2019
Summary as in 95d ahead (to Dec 2) 32 days - General confidence B 75%

Major contrasts across Usa + rapid changes.
Mostly dry and fine in South and center parts.
Rain / snow in north with more snow / blizzards later.

- Short heatwave in SW / far west 21st-26th
- Snow sometimes in West but mostly N/E with EXTREME COLD NE at month end.
- High pressure often in center latitudes and S/E. Low(er) SW and NE
- Sudden shifts in Jet Stream with big meanders to South especially in East / NE

Climate note on wild jet stream dramatic contrasts & rapid changes.
The present wild JetStream extreme variations are all caused and predicted by solar activity considerations and nothing whatsoever to do with Fake Science blaming CO2 levels - which evidence-based science shows are effects not cause of climate changes.
The world-wide WILD Jet-Stream and polar vortex shifts in the last 12 months show continuing failure of Man-Made Global warming alarmism because they are the wrong type of extremes for the CO2 story which requires a north-shifted shorter not wildly waving Jet-stream and a relatively fixed polar vortex. The present type of circulation patterns were predicted in 2008 by Piers Corbyn at the New York Heartland conference and are part of solar-lunar controlled wild Jet-Stream/Little-Ice-Age (in winter) circulation.

Key Weather Developments

November 1 - 5th 2019

Solar Factors: R2

Large high center-south to NW USA.
Displaced polar vortex low centered West Canada / Hudson bay.

North-center, Great Lakes, NE & Midwest very cold with snow.
East center USA sleet/rain.
West Gulf + Florida + SE dry + bright
East Gulf to NW fine + very warm, "Indian Summer"
Center-West dry, cold nights bright/variable sky.

November 6 – 9th 2019

Solar Factors: Active R3

Low Center / (East) Great Lakes / NE.

High SE/Florida

Lows far South of West.

Large high N Center – West USA

Great Lakes, NE & Midwest sleet + snow & cold rain, cold; hail center-East.

SE + Florida dry fine warm.

South center mostly dry variable sky.

South of west some showers quite warm variable sky.

North center & North half of west + most of west Rockies, dry fine cold nights.

West coast dry warm + fine.

Nov 10 - 15th 2019 Forecast
Confidence AB 80%
Timing normally to 1 or 2 days; positions approximates

Key Weather Developments

November 10 - 15th 2019

Solar Factors:
R3 (10-11),  R5 (12-15)

High West Great Lakes to NE.
Active v. cold Low centered far NE USA/Newfoundland.
Active low SW USA.

Far NE snow then blizzards in bitter v. cold blast thunder-snow possible.
East Great Lakes snow showers.
Most of East mostly dry, vble sky.
Florida dry warm.
West Gulf dry mild bright.
SW: Thundery showers/deluges; tornado development possible, large hail.
West dry + mostly mild.
North fine NW to West Great Lakes.
Dry with cold nights + fog (esp Great Lakes)
November 16 – 24th 2019 Forecast

Confidence BC 70%
Timing normally to 1 or 2 days; positions approximates

Key Weather Developments

Solar Factors: R3.

High N USA/South Canada espec NE USA & North of West. Large Low centered west-center USA.
High East (coast). Low Pacific for West Usa.

Far NE some showers (perhaps wintry) cool.
(North) Great Lakes dry + foggy.
Most of East USA dry mild/warm and bright/sunny (for East).
Florida dry warm sunny.
Center-center of West thundery showers + deluges, quite mild + humid.
West coast dry quite mild fine.
North USA from NW to N center dry cold nights some hail N plains.

Key Weather Developments

Nov 28th – Dec 2nd

Solar Factors: R5 (28-30), R3 (1-2)

Active displaced polar vortex “polar type”, Low NE USA.

Large High centered ~N Center over most of USA.

Low S California.

Great Lakes, Midwest & N/E. Snow deluges, blizzards; very bitter winds. Travel lock down.

N center to SE dry cold night variable sky.

Gulf states + Florida + Texas dry + mild.

West USA dry very fine. “Indian Summer”, most of CA + far SW.

Far SW rain thunder, hail + tornado developments.
