

**News Release (WANews1804) 22-03-18 - Pass it on!****April 1<sup>st</sup> comes early for Imperial College Grantham Institute!**

- Piers Corbyn challenges Climate Charlatans to give evidence for their Fake-Science “cold is warm” claims.
- **More serious cold blasts** to hit UK, Eire & Europe this Spring he warns =>

Professor Martin Siegart co-director of the Grantham Institute for Climate Change at Imperial College London made the hilarious claim, apparently thinking it was April Fools Day come early, that the **extreme cold** “beast from the East blast” over Britain, Ireland and Europe is a result of man-made **global warming!**

“What we can say is that the extreme weather events we are witnessing are completely in line with (CO2 Man-Made) climate change” he claims in the Express 20<sup>th</sup> March -

\*<https://www.express.co.uk/news/weather/934705/uk-weather-forecast-easter-beast-from-the-east-return-uk-weather-climate-change>

**Piers Corbyn, an astrophysicist (MSc), and a First class graduate of Imperial College Physics (+theoretical physics) 1968**, which he entered with a Royal Scholarship in 1965, and former President of the student Union there (1969-70) commented:-

**“Prof Siegart\*\* just made up his claims for which there is no evidence or scientific basis whatsoever. I challenge him to give scientific evidence and justification for his claims:-**

(\*\*graduated BSc Geological Geophysics Univ of Reading).

1. **To provide a source** for the claim that such cold extremes would come and be caused by man-made global warming. The claims and warnings (with reasons) of such of course must substantially pre-date the advent of such cold extremes and WeatherAction’s solar-based predictions of them, such as these which could easily be labelled **“as we expected” by any charlatan after the event.**
2. **Explain how the extremely wavy south-shifted Jet-stream** which gave these cold blasts and which were predicted by solar activity months ahead (see [www.WeatherAction.com](http://www.WeatherAction.com)) has become something *“in line with CO2 driven man-made climate change”* whereas the CO2 theory predicts the **OPPOSITE** Jet stream behaviour. The CO2 general warming theory

REQUIRES a generally pole-ward shifted (ie larger warm area south of Jet stream), shorter and less-wavy jet-stream which cannot in any way give these type of very wavy jet stream and **polar-vortex splitting circulation.** **What we have is the wrong type of extremes for the CO2 “theory”.**

3. **Give evidence** that CO2 increases lead to increases in world temperature in the real world when real data shows that **CO2 levels are an EFFECT NOT A CAUSE of temperature changes.** They rise **after** temperatures rise because ocean circulation delays expulsion of CO2 from warmer seas.
4. **Give evidence** that Man’s CO2 production into the biosphere (which is 4% of the total natural flux in and out of the atmosphere which itself is only 0.04% of the atmosphere) is **FOLLOWED** by nature’s 96%. **For nature’s 96% to follow Man’s 4% requires a conspiracy of nature absurd beyond belief.** If nature doesn’t follow Man on this then Man’s CO2 is not the driver of anything in weather or climate. He also must explain why since termites produce ten times the CO2 equivalent of Man that Imperial College Grantham Institute has not declared **war on termites.**

• Piers added: **“If Prof Siegart cannot answer these basic questions I will be asking the Imperial College Authorities and Governing body if they have dropped evidence-based science as their core guide to excellence and are they becoming a Fake-Science religious operation?”.**
